# Letter from the CEO

Dear shareholders,

On 9 January 2026, we successfully closed the acquisition of what is now Erste Bank Polska. With Poland as its eighth core market alongside Austria, the Czech Republic, Slovakia, Romania, Hungary, Croatia and Serbia, Erste Group is securing, over the long term, its position as the leading bank for retail and corporate customers in Central Europe, indisputably the fastest growing region in Europe. A net profit of EUR 879 million for the first three months of the year of 2026, posted despite the announced charges due to first-time consolidation of Erste Bank Polska, is an impressive testament to the potential of this new Erste Group.

But even without Erste Bank Polska, business momentum remained positive: the key components of operating income – net interest income and net fee and commission income – rose by 6.5% and 7.3%, respectively. The positive development of net interest income was primarily based on loan growth and repricing of customer deposits as well as higher income from the liquidity portfolio. Year on year, the net interest margin rose correspondingly. Net fee and commission income was again driven by the securities business and payment services. Including Erste Bank Polska, Erste Group posted operating income of nearly EUR 4 billion in the first quarter while costs totalled EUR 1.8 billion. In addition to personnel expenses, IT costs were the key factor driving this increase. Another EUR 30 million were posted in the first quarter as integration costs. As in the past, contributions to deposit insurance schemes of EUR 48 million were again posted upfront in the first quarter for the full year. Amortisation and depreciation related to Poland were incurred for the first time: EUR 66 million for the acquired customer base and brand. Overall, operating income rose at a faster pace than costs, resulting in a further improvement in operating efficiency. Or, in other words: the cost-income-ratio now stands at 45.0%.

Just a few words on other operating result, which was materially impacted by banking levies in Austria, Hungary (here, with the exception of transaction taxes, already for the full year of 2026), Poland and Romania totalling EUR 250.4 million versus EUR 121.3 million in the first quarter of the previous year. This rise was only partly offset by a gain from the sale of a Croatian company.

The consolidation of Erste Bank Polska led to a significant increase in total assets, from EUR 369 billion at year-end 2025 to EUR 450 billion at the reporting date. Customer deposits – one of the traditional strengths of Erste Group – rose to EUR 315 billion (including EUR 54 billion from Poland). Including the Polish loan portfolio of slightly above EUR 40 billion, loans and advances to customers amounted to EUR 276 billion at the end of March. Here again, we benefited not only from the consolidation of Erste Bank Polska. Even without it, first-quarter loan growth came in at 1.5%, supported by the retail business as well as – and even slightly more so – by the corporate business. Asset quality remained more than satisfactory across all core markets, with the NPL ratio stable at 2.4% despite inclusion of Erste Bank Polska. Risk costs for the first three months amounted to EUR 439 million, which is equivalent to a provisioning ratio (of average gross customer loans) of 68 basis points. Thereof, however, EUR 302 million were not the result of a deterioration in portfolio quality, but had to be posted under IFRS 9 for the acquired portfolio as part of first-time consolidation. This is hence a one-off effect. This time, moreover, risk costs did not benefit from the release of provisions for credit risks driven by updated forward-looking economic indicators (FLIs) and stage overlays. On the contrary: in the quarter ended, they were even slightly up.

This takes me to the dominating macroeconomic theme of recent weeks, namely the war in Iran and its consequences. Higher energy prices have led to revisions of economic forecasts world-wide and not spared our region either. While for five of our core markets – Poland, Austria, Slovakia, Hungary and Serbia – we still expect better growth than in 2025, we anticipate slightly less momentum for the Czech Republic, Romania and Croatia than in the previous year. In view of the renewed rise in inflation expectations, still in the low to mid-single digit range, no further rate cuts are expected in the euro zone, Poland, Hungary and Serbia this year from today's vantage point, which again is beneficial for the banking business.

Finally, regarding Erste Group's capitalisation: it is still excellent, even after the acquisition of the 49% stake in Erste Bank Polska that was funded entirely from internal resources. Including interim profit, the common equity tier 1 ratio stood at 14.8% at the end of March 2026. To recall: we have thus already achieved our new target CET1-ratio of 14.25%. This means that we definitely have the capacity to return to previous payout ratios. We will do this to the full extent, however, only if alternative capital allocation options do not offer higher returns for you, our shareholders. Working with our employees, I am looking forward to continuing the successful growth strategy of Erste Group in Central Europe.

Peter Bosek m.p.

# Erste Group on the capital markets

## EQUITY MARKET REVIEW

Equity markets initially continued their previous uptrends on the back of rate cuts implemented in the US and Europe in the preceding year as well as improved corporate growth forecasts. Most of the indices covered reached new record highs in the course of the first quarter. The European equity market benefited in particular from better revenues and profits prospects of European corporates and significantly outperformed the US market. In March, market slides caused by the onset of the Iran conflict in February erased previous gains. With the exception of the FTSE 100, AEX, ATX and Nikkei, the indices covered ended the first quarter lower. In the US, the Dow Jones Industrial Average declined by 3.6% to 46,341.51 points, the broader Standard & Poor's 500 4.6% to 6,528.82 points and the NASDAQ technology index 7.1% to 21,590.63 points. The Stoxx Europe 600 index, which reflects the performance of the 600 largest exchange-listed companies from 17 European countries, lost 1.5% and closed the quarter at 583.14 points. The Euro Stoxx Banks Index, which is composed of the leading European bank shares, suffered a drop by 9.3% in the first quarter of 2026 after its record gain of 80.3% in 2025 and ended March at 238.89 points. Austria's ATX (Austrian Traded Index) closed the reporting period up 0.3%, nearly unchanged year-to-date, at 5,343.25 points. Prior to that the Austrian leading index had hit a new all-time high at 5,820.55 points on 18 February.

Against the backdrop of geopolitical developments and their potential impacts on supply chains, inflation, global economic growth and interest rates, the focus of investors was again on the meetings of the European Central Bank (ECB) and the US central bank Federal Reserve (Fed). Both central banks left their rates unchanged in the first quarter, the Fed within the range of 3.50% to 3.75%, the ECB at 2.00%.

## SHARE PERFORMANCE

The acquisition of a controlling stake in Santander Bank Polska was closed in early January and the 2025 financial result released at the end of February beat market expectations. In addition to the strong capital build-up, the limelight was in particular on the 2026 outlook for the "new" Erste Group, including Poland as a core market for the first time. On 3 February, the share marked its highest closing price to date at EUR 110.80. Amid geopolitical uncertainty, the Erste Group share also sustained a loss in value. It saw its first-quarter low at EUR 89.35 on 20 March 2026. On 31 March 2026, the closing price stood at EUR 92.50.

The Erste Group share is listed on the stock exchanges Vienna, Prague and Bucharest. Its main stock exchange is Vienna. In the quarter ended, trading volume there averaged 397,384 shares per day.

## ISSUING ACTIVITIES

As in previous years, Erste Group tapped the capital markets already in January. Erste Group issued a EUR 750 million T2 note (MS+127bps), which was received with significant investor demand (peak order book exceeded EUR 4 billion). Further transactions were issued by Slovenská sporiteľňa (mortgage covered bond) followed by Erste Bank Hungary (senior preferred notes) and Česká spořitelna (senior non-preferred). In addition, Erste Group made use of another issuance opportunity at the end of January (EUR 750m 6.25NC5.25 senior preferred note at MS+62bps).

As the Iran war led to a temporary closure of the funding markets, Erste Group decided to bring forward secured funding by issuing a EUR 1 billion mortgage covered bond (5y, MS+25bps) as a supportive market backdrop materialised end of March.

## INVESTOR RELATIONS

In the first quarter, Erste Group's management and the investor relations team held a large number of one-on-one and group meetings. Questions raised by investors and analysts were answered both at in-person events as well as during telephone and video conferences. The presentation of the 2025 annual results in Vienna was followed by the analysts' dinner and a roadshow day with investor meetings in London. The economic development and the strategy of Erste Group against the backdrop of the current economic environment were presented at international banking and investor conferences hosted by the Vienna Stock Exchange, Kepler Cheuvreux, CaixaBank, UBS, Société Générale, Morgan Stanley, PKO Bank, Baader Bank, Bank Pekao and Wood.

# Interim management report

In the interim management report, financial results from January to March 2026 are compared with those from January to March 2025 and balance sheet positions as of 31 March 2026 with those as of 31 December 2025. The first-time consolidation of Erste Bank Polska resulted in significant changes of multiple position.

## EARNINGS PERFORMANCE IN BRIEF

**Net interest income** rose to EUR 2,674 million (+42.8%; EUR 1,872 million). Increases were recorded primarily in Slovakia, the Czech Republic and Hungary on the back of loan growth and lower interest expenses on customer deposits, the latter most notably in Austria. An additional major contribution came from Poland in the amount of EUR 681 million. **Net fee and commission income** rose in nearly all core markets and income categories to EUR 965 million (+23.7%; EUR 780 million), including EUR 128 million from Poland. **Net trading result** increased to EUR 161 million (EUR 47 million); the line item **gains/losses from financial instruments measured at fair value through profit or loss** rose to EUR 68 million (EUR 50 million). The development of both line items was mostly attributable to valuation effects. **Operating income** was up at EUR 3,939 million (+40.5%; EUR 2,802 million), with EUR 901 million contributed by Poland. **General administrative expenses** rose to EUR 1,771 million (+31.7%; EUR 1,345 million), including EUR 359 million from Poland. In the first quarter, integration costs of EUR 30 million in total were booked. Personnel expenses increased to EUR 974 million (+22.7%; EUR 794 million). This was primarily due to the consolidation of the Poland segment (EUR 138 million) and collectively agreed salary increases. Other administrative expenses were higher at EUR 556 million (+34.1%; EUR 414 million), thereof EUR 125 million in Poland. While contributions to deposit insurance schemes included in other administrative expenses – mostly already posted upfront for the full year of 2026 – declined to EUR 48 million (EUR 54 million), IT expenses increased to EUR 244 million (EUR 166 million), most importantly due to the inclusion of Poland (EUR 58 million). Amortisation and depreciation amounted to EUR 241 million (+77.6%; EUR 136 million), with Poland accounting for EUR 96 million. Overall, the **operating result** increased to EUR 2,167 million (+48.7%; EUR 1,458 million), the **cost/income ratio** improved to 45.0% (48.0%).

The **impairment result from financial instruments** amounted to EUR -439 million or 68 basis points of average gross customer loans (EUR -85 million or 15 basis points). The rise was materially attributable to allocations to provisions for loans and advances related to the first-time inclusion of the Polish portfolio as required under IFRS 9 rules (EUR 302 million or 47 basis points). The **NPL ratio** based on gross customer loans remained at 2.4% (2.4%). The **NPL coverage ratio** (excluding collateral) stood at 67.9% (69.7%).

**Other operating result** amounted to EUR -194 million (EUR -184 million). Expenses for annual contributions to resolution funds included in this line item already for the full year of 2026 declined to EUR 13 million (EUR 15 million). Banking levies – currently payable in five core markets – went up, though. EUR 251 million (EUR 121 million) are reflected in other operating result: thereof, EUR 152 million (EUR 78 million) were charged in Hungary (including EUR 120 million banking tax for the full year), EUR 50 million in Poland. In Austria, banking tax amounted to EUR 32 million (EUR 34 million), in Romania to EUR 16 million (EUR 10 million). The banking tax in Slovakia of EUR 16 million (EUR 15 million) is posted in the line item taxes on income.

**Taxes on income** amounted to EUR 376 million (EUR 242 million). The minority charge increased to EUR 279 million (EUR 197 million) on the back of higher contributions from the savings banks and the inclusion of the Poland segment (EUR 17 million). The **net result attributable to owners of the parent** rose to EUR 879 million (+ 18.2%; EUR 743 million).

**Total equity** not including AT1 instruments rose to EUR 36.8 billion (EUR 31.2 billion). After regulatory deductions and filtering in accordance with the Capital Requirements Regulation (CRR), **common equity tier 1 capital** (CET1) decreased to EUR 26.5 billion (EUR 28.5 billion). Total **own funds** stood at EUR 35.8 billion (EUR 36.5 billion). Interim profit for the first quarter is not included in the above figures. Total risk (**risk-weighted assets** including credit, market and operational risk) rose to EUR 183.2 billion (EUR 147.5 billion), which was mostly attributable to the acquisition of Erste Bank Polska. The **common equity tier 1 ratio** (CET1 ratio) declined to 14.5% (19.3%), the **total capital ratio** to 19.5% (24.8%). The initial consolidation of Erste Bank Polska reduced the CET1 ratio by 455 basis points.

**Total assets** increased to EUR 450.0 billion (+22.1%; EUR 368.6 billion). On the asset side, cash and cash balances declined to EUR 26.8 billion (EUR 27.6 billion); loans and advances to banks increased to EUR 26.4 billion (EUR 20.8 billion). Year to date, **loans and advances to customers** rose to EUR 275.6 billion (+18.8%; EUR 232.0 billion), most importantly on the back of the Polish portfolio of EUR 40.1 billion. In the other core markets, increased volume was recorded most notably in Austria and the Czech Republic. On the liability side, deposits from banks rose to EUR 19.7 billion (EUR 16.9 billion).

**Customer deposits** were up at EUR 314.8 billion (+24.4%; EUR 253.0 billion). This rise was driven mainly by the first-time consolidation of Poland (EUR 53.8 billion) as well as higher deposits from corporates in Austria and the Czech Republic. The **loan-to-deposit ratio** stood at 87.6% (91.7%).

## OUTLOOK

Erste Group's goal for 2026 is to achieve a return on tangible equity (ROTE) of about 19% and an increase in earnings per share of more than 20% based on 2025 net profit adjusted for one-off items compared to 2026 net profit adjusted for extraordinary items connected to the acquisition and first-time consolidation of Erste Bank Polska. This ambition is built on the following key assumptions: Firstly, Erste Group's business, as at year-end 2025 in seven core markets (Austria, Czech Republic, Slovakia, Romania, Hungary, Croatia and Serbia), is expected to perform well, supported by an improved macro-economic environment, broadly stable interest rates, especially in the euro zone, stable margins and healthy loan volume growth of more than 5%. Operating performance as defined by operating result (operating income minus operating expenses) is expected to improve year-on-year, as net interest income is projected to grow by about 5%, fee and commission income continues to grow by more than 5%, net trading and fair result produces a similar revenue contribution as in 2025, and operating expenses grow in the order of 3%. Consequently, the cost/income ratio is expected to improve from the level of about 48% in 2025 to about 47% in 2026. Other operating result is expected to normalise following several positive one-offs in the amount of about EUR 270 million in 2025 and be more in line with the amount of banking levies also booked in this line item. Risk costs, at 20-25 basis points, are expected at a similarly benign level as in 2025.

Secondly, extraordinary effects due to the full consolidation of Erste Bank Polska are primarily expected in net interest income, operating expenses and risk costs. Net interest income will be negatively impacted by about EUR 170 million (equivalent to a net profit impact of approx. EUR -60 million) connected to the amortisation of positive fair value adjustments recognised on debt securities and derivatives in the course of purchase price allocation. In addition, interest income earned on the purchase price in 2025 will not recur in 2026. Operating expenses will be affected by the amortisation of intangibles (customer stock and brand) and the booking of integration costs. Customer relationships will be amortised over 10 years in the amount of about EUR 210 million per annum (net profit impact of approx. EUR -70 million), while the brand will be fully written off following rebranding in 2026 (EUR 30 million gross or EUR -10 million net). Integration costs are forecast at up to EUR 180 million gross in 2026. The corresponding net impact will depend on the allocation of costs between the parent company and the local bank, which is still to be determined. Risk costs will be impacted by a EUR 302 million charge (net profit impact of about EUR -120 million) for expected credit losses of the Polish portfolio required under IFRS 9 in the course of the first-time consolidation. This charge is not indicative of portfolio deterioration.

Consequently, taking into account organic underlying growth as well as the contribution from Erste Bank Polska, including extraordinary effects from its first-time consolidation, Erste Group in its now eight core markets, in 2026, targets net interest income in excess of EUR 11 billion, fee income of approx. EUR 4 billion and operating expenses of about EUR 7 billion. Consequently, the cost/income ratio is projected to improve to about 45%. Risk costs are expected in the range of 25-30 basis points of average gross customer loans, as risk costs tend to be somewhat higher in Poland than in other CEE markets. This expectation is adjusted for the EUR 302 million one-off ECL provision mentioned above. Reported net profit for the combined entity is forecast somewhat below EUR 4 billion, net profit adjusted for extraordinary items related to first time consolidation of Erste Bank Polska is projected at somewhat above EUR 4 billion.

In line with the projected strong profit performance, the CET1 ratio is expected to increase again in 2026, providing renewed capital return and/or M&A flexibility.

Potential risks to the guidance include (geo)political and economic (including monetary and fiscal policy impacts) developments, regulatory measures, as well as changes to the competitive environment. Current international (military) conflicts do not impact Erste Group directly, as it has no operating presence in regions involved. Indirect effects, such as financial markets volatility, sanctions-related knock-on effects, supply chain disruptions or the emergence of deposit insurance or resolution cases cannot be ruled out, though. Erste Group is moreover exposed to non-financial and legal risks that may materialise regardless of the economic environment. Worse than expected economic development may put goodwill at risk.

## PERFORMANCE IN DETAIL

in EUR million	1-3 25	1-3 26	Change
Net interest income	1,872	2,674	42.8%
Net fee and commission income	780	965	23.7%
Net trading result and gains/losses from financial instruments at FVPL	97	229	137.1%
Operating income	2,802	3,939	40.5%
Operating expenses	-1,345	-1,771	31.7%
<b>Operating result</b>	<b>1,458</b>	<b>2,167</b>	<b>48.7%</b>
Impairment result from financial instruments	-85	-439	414.3%
Other operating result	-184	-194	5.3%
Levies on banking activities	-121	-251	106.7%
<b>Pre-tax result from continuing operations</b>	<b>1,182</b>	<b>1,533</b>	<b>29.6%</b>
Taxes on income	-242	-376	54.9%
<b>Net result for the period</b>	<b>940</b>	<b>1,157</b>	<b>23.1%</b>
Net result attributable to non-controlling interests	197	279	41.7%
Net result attributable to owners of the parent	<b>743</b>	<b>879</b>	<b>18.2%</b>

### Net interest income

Net interest income rose especially in the CEE markets. Increases were mainly driven by higher loan volumes in Slovakia, the Czech Republic and Hungary as well as lower interest expenses on customer deposits in Austria. An additional major contribution came from Poland in the amount of EUR 681 million. The net interest margin (calculated as the annualised sum of net interest income, dividend income and net result from equity method investments over interest-bearing assets at the end of the first quarter) stood at 2.64% (2.32%), with the rise being primarily attributable to the first-time consolidation of the Poland segment.

### Net fee and commission income

Growth was achieved across nearly all core markets and income categories, with asset management and payment services showing a particularly positive development. The securities business also performed well. A significant contribution to higher fee and commission income came from Poland in the amount of EUR 128 million.

### Net trading result & gains/losses from financial instruments measured at fair value through profit or loss

Net trading result as well as the line item gains/losses from financial instruments measured at fair value through profit or loss are materially affected by the fair value measurement of debt securities issued. The related valuation is shown in the fair value result, the valuation of corresponding hedges in the net trading result.

Net trading result improved on the back of strong foreign exchange business in Poland to EUR 161 million (EUR 47 million). Gains/losses from financial instruments measured at fair value through profit or loss likewise improved to EUR 68 million (EUR 50 million), most notably due to gains from the valuation of debt securities in issue at fair value.

### General administrative expenses

in EUR million	1-3 25	1-3 26	change
Personnel expenses	-794	-974	22.7%
Other administrative expenses	-414	-556	34.1%
Depreciation and amortisation	-136	-241	77.6%
<b>General administrative expenses</b>	<b>-1,345</b>	<b>-1,771</b>	<b>31.7%</b>

Personnel expenses increased, most importantly due to the first-time inclusion of Poland (EUR 138 million) although rises were recorded in all other core markets, driven mostly by collectively agreed salary increases. The rise in other administrative expenses was primarily attributable to higher IT and consulting expenses. Overall, EUR 30 million integration costs were booked, EUR 21 million thereof in Poland. Contributions to deposit insurance schemes (already for the full year 2026) declined to EUR 48 million (EUR 54 million). This decline was almost exclusively attributable to Austria and Romania, where contributions fell to EUR 15 million (EUR 19 million) and EUR 0 million (EUR 4 million) respectively. Amortisation and depreciation increased to EUR 241 million (EUR -136 million), primarily as a result of the first-time inclusion of Poland. In Poland, first-quarter amortisation and depreciation amounted to EUR 96 million, with the key items being the amortisation of the acquired customer relationships and brand (EUR 66 million). The cost/income ratio stood at 45.0% (48.0%).

## Headcount as of end of the period

	Dec 25	Mar 26	Change
<b>Austria</b>	<b>16,844</b>	<b>16,802</b>	<b>-0.2%</b>

## Gains/losses from derecognition of financial instruments not measured at fair value through profit or loss and of financial assets measured at amortised cost

Gains/Losses from this position amounted to EUR -2 million (EUR -6 million). This includes mainly losses from the sale of securities in Poland.

## Impairment result from financial instruments

The impairment result from financial instruments amounted to EUR -439 million (EUR -85 million). Net allocations to provisions for loans and advances amounted to EUR 448 million (EUR 105 million), most of which were seen in Poland where, in accordance with IFRS 9 rules, provisions in the amount of EUR 302 million had to be allocated for the entire acquired portfolio as part of first-time consolidation. Positive contributions came from high recoveries, primarily in Austria.

## Other operating result

Other operating result is significantly affected by taxes and levies on banking activities and one-off effects. Taxes and levies on banking activities included in this line item rose to EUR 251 million (EUR 121 million). In Hungary, banking levies (with the exception of the transaction tax already for the full year 2026) increased to a total of EUR 152 million (EUR 78 million) due to a higher tax rate as well as a larger tax base resulting from higher profits. In Romania, banking levies rose to EUR 16 million (EUR 10 million), mainly due to the doubling of the bank tax rate from 2% to 4% in July 2025. In Austria, banking tax amounted to EUR 32 million (EUR 34 million). In Poland, banking tax amounted to EUR 50 million. A positive impact came from the rise in the result from other operating expenses/income to EUR 108 million (EUR -6 million), which includes a EUR 116 million gain from the sale of a company in Croatia. Contributions to resolution funds declined to EUR 13 million (EUR 15 million). In 2026, credit institutions in the euro zone are again not being charged regular contributions.

## Net result attributable to owners of the parent

Taxes on income amounted to EUR 376 million (EUR 242 million). The minority charge increased to EUR 279 million (EUR 197 million) on the back of higher contributions from the savings banks and the inclusion of the Poland segment (EUR 17 million). The net result attributable to owners of the parent rose to EUR 879 million (+18.2%; EUR 743 million). The return on tangible equity (ROTE) was 18.1% (15.2%).

## FINANCIAL RESULTS – QUARTER-ON-QUARTER COMPARISON

First quarter of 2026 compared with the fourth quarter of 2025

in EUR million	Q1 25	Q2 25	Q3 25	Q4 25	Q1 26
<b>Income statement</b>					
Net interest income	1,872	1,914	1,975	2,027	2,674
Net fee and commission income	780	762	798	850	965
Dividend income	3	26	3	4	4
Net trading result	47	94	90	82	161
Gains/losses from financial instruments measured at fair value through profit or loss	50	10	-2	49	68
Net result from equity method investments	7	16	10	13	19
Rental income from investment properties & other operating leases	43	45	45	46	48
Personnel expenses	-794	-830	-824	-886	-974
Other administrative expenses	-414	-393	-399	-481	-556
Depreciation and amortisation	-136	-138	-139	-147	-241
Gains/losses from derecognition of financial assets at AC	-6	-7	-10	-26	-3
Other gains/losses from derecognition of financial instruments not at FVPL	0	-1	14	-4	2
Impairment result from financial instruments	-85	-97	-136	-159	-439
Other operating result	-184	1	-29	54	-194
Levies on banking activities	-121	-76	-87	-88	-251
<b>Pre-tax result from continuing operations</b>	<b>1,182</b>	<b>1,400</b>	<b>1,395</b>	<b>1,422</b>	<b>1,533</b>
Taxes on income	-242	-287	-286	-287	-376
<b>Net result for the period</b>	<b>940</b>	<b>1,113</b>	<b>1,109</b>	<b>1,135</b>	<b>1,157</b>
Net result attributable to non-controlling interests	197	192	208	191	279
<b>Net result attributable to owners of the parent</b>	<b>743</b>	<b>921</b>	<b>901</b>	<b>944</b>	<b>879</b>

The changes reflected in the quarter-on-quarter comparison are again materially attributable to the consolidation of the Poland segment.

**Net interest income** increased by 31.9%, most notably due to the first-time consolidation of Poland. **Net fee and commission income** was up 13.4%, mainly due to higher income from the securities business and payment services.

**Net trading result** rose to EUR 161 million (EUR 82 million), again primarily due to the first-time inclusion of Poland. **Gains/losses from financial instruments measured at fair value through profit or loss** were also up.

**General administrative expenses** increased by 16.9%. In the first quarter, integration costs in an amount of EUR 30 million were booked (EUR 38 Million). The operating result rose to EUR 2,167 million (EUR 1,557 million). The **cost/income ratio** improved to 45.0% (49.3%).

**Gains/losses from derecognition of financial instruments not measured at fair value through profit or loss and from financial assets measured at amortised cost** amounted to EUR -2 million (EUR -30 million).

The **impairment result from financial instruments** deteriorated mainly due to net allocations for loans and advances, most notably in Poland. As part of the first-time consolidation, provisions in the amount of EUR 302 million were allocated for the entire acquired portfolio in accordance with IFRS 9.

**Other operating result** deteriorated despite a positive one-off effect of EUR 116 million in Croatia from the sale of a company. In the comparative quarter, positive one-off effects had been stronger, though: EUR 90 million from the release of provisions for legal risks and EUR 43 million from real estate sales in the Czech Republic. Adverse effects also resulted from taxes and levies on the banking business, which increased to EUR 251 million (EUR 88 million): in Hungary, banking tax rose to a total of EUR 152 million (EUR 34 million) due to a seasonal effect (banking tax is paid in the first quarter upfront for the full year) as well as a higher tax rate and a larger tax base resulting from higher profits. In Romania, the banking levy declined to EUR 16 million (EUR 22 million), in Austria it amounted to EUR 32 million (EUR 32 million). In addition, banking tax was payable in Poland in the amount of EUR 50 million.

The **net result attributable to owners of the parent** declined to EUR 879 million (-6.9%; EUR 944 million). The **return on tangible equity (ROTE)** improved to 18.1% (16.0%).

## BALANCE SHEET

in EUR million	Dec 25	Mar 26	Change
<b>Assets</b>			
Cash and cash balances	27,573	26,850	-2.6%
Trading, financial assets	79,522	106,177	33.5%
Loans and advances to banks	20,827	26,382	26.7%
Loans and advances to customers	231,985	275,630	18.8%
Intangible assets	1,413	5,915	318.6%
Miscellaneous assets	7,254	9,073	25.1%
<b>Total assets</b>	<b>368,574</b>	<b>450,027</b>	<b>22.1%</b>
<b>Liabilities and equity</b>			
Financial liabilities held for trading	2,412	4,975	106.2%
Deposits from banks	16,919	19,658	16.2%
Deposits from customers	252,991	314,772	24.4%
Debt securities issued	54,872	59,891	9.1%
Miscellaneous liabilities	6,715	10,423	55.2%
Total equity	34,665	40,308	16.3%
<b>Total liabilities and equity</b>	<b>368,574</b>	<b>450,027</b>	<b>22.1%</b>

**Cash and cash balances** amounted to EUR 26.8 billion (EUR 27.6 billion). **Trading and investment securities** held in various categories of financial assets increased to EUR 106.2 billion (EUR 79.5 billion), most notably due to the rise in debt securities in Poland.

**Loans and advances to credit institutions (net)**, including demand deposits other than overnight deposits, rose to EUR 26.4 billion (EUR 20.8 billion). **Loans and advances to customers (net)** increased to EUR 275.6 billion (EUR 232.0 billion), most notably in Austria. Poland's share of loans and advances to customers (net) came to EUR 40.1 billion. In the seven original core markets, loan growth was recorded in both retail and corporate business.

**Loan loss allowances for loans to customers** were almost unchanged at EUR 4.5 billion (EUR 4.0 billion). The **NPL ratio** – non-performing loans as a percentage of gross customer loans – was stable at 2.4% (2.4%), the **NPL coverage ratio** (based on gross customer loans) slipped to 67.9% (69.7%).

**Financial liabilities – held for trading** amounted to EUR 5.0 billion (EUR 2.4 billion). **Deposits from banks** rose to EUR 19.7 billion (EUR 16.9 billion). **Deposits from customers** increased to EUR 314.8 billion (EUR 253.0 billion) mostly on the back of deposits from corporate customers in Austria and the Czech Republic. Poland's contribution to customer deposits amounted to EUR 53.8 billion. The **loan-to-deposit ratio** stood at 87.6% (91.7%). **Debt securities in issue** rose to EUR 59.9 billion (EUR 54.9 billion).

**Total assets** rose to EUR 450.0 billion (EUR 368.6 billion). **Total equity** increased to EUR 40.3 billion (EUR 34.7 billion). This includes AT1 instruments in the amount of EUR 3.5 billion. After regulatory deductions and filtering according to the Capital Requirements Regulation (CRR) **common equity tier 1 capital** (CET1) decreased to EUR 26.5 billion (EUR 28.5 billion) as were **total own funds** to EUR 35.8 billion (EUR 36.5 billion). The interim profit for the first quarter of the year is not included in the above figures. Total risk – **risk-weighted assets** including credit, market and operational risk – increased to EUR 183.2 billion (EUR 147.5 billion), with EUR 32.9 billion attributable to Erste Bank Polska.

The **total capital ratio**, total eligible qualifying capital in relation to total risk, stood at 19.5% (24.8%), well above the legal minimum requirement. The **tier 1 ratio** was 16.5% (21.7%), the **common equity tier 1 ratio** 14.5% (19.3%). The decline in capital ratios is attributable to the initial consolidation of Erste Bank Polska which had a negative impact of 455 basis points on the common equity tier 1 ratio.

## BUSINESS DEVELOPMENT IN THE CORE MARKETS

January-March 2026 compared with January-March 2025

The tables and information below provide a brief overview of the development in the core markets by geographical segments (operating segments) focusing on selected and summarized items. For more details please see Note 28 Segment reporting. At [www.erstegroup.com/investorrelations](http://www.erstegroup.com/investorrelations) additional information is available in Excel format.

Operating income consists of net interest income, net fee and commission income, net trading result, gains/losses from financial instruments measured at fair value through profit or loss, dividend income, net result from equity method investments and rental income from investment properties & other operating leases. The latter three listed items are not shown in the tables below. Net trading result and gains/losses from financial instruments measured at fair value through profit or loss are summarized under one position. Operating expenses correspond to the position general administrative expenses. Operating result is the net amount of operating income and operating expenses. Risk provisions for loans and receivables are included in the position impairment result from financial instruments. Other result summarizes the positions other operating result and gains/losses from financial instruments not measured at fair value through profit or loss, net. The cost/income ratio is calculated as operating expenses in relation to operating income. The return on allocated capital is defined as the net result after tax/before minorities in relation to the average allocated capital.

### Austria

#### ERSTE BANK OESTERREICH & SUBSIDIARIES

in EUR million	1-3 25	1-3 26	Change
Net interest income	253	271	7.0%
Net fee and commission income	144	151	4.6%
Net trading result and gains/losses from financial instruments at FVPL	6	-15	n/a
Operating income	421	427	1.3%
Operating expenses	-197	-200	1.6%
Operating result	225	227	1.0%
Cost/income ratio	46.7%	46.9%	
Impairment result from financial instruments	-18	-16	-15.2%
Other result	-24	-7	-69.7%
Net result attributable to owners of the parent	134	148	10.5%
Return on allocated capital	22.0%	25.1%	

The Erste Bank Oesterreich & Subsidiaries (EBOe & Subsidiaries) segment comprises Erste Bank der oesterreichischen Sparkassen AG (Erste Bank Oesterreich) and its main subsidiaries (e.g. s Bausparkasse, Tiroler Sparkasse, Sparkasse Hainburg). Salzburger Sparkasse was merged with Erste Bank Oesterreich as of 1 August 2025.

Net interest income increased due to lower expenses for customer deposits and higher income from debt securities which was partially offset by the repricing of variable rate customer loans and lower income from placements at the central bank due to the decreased interest rate environment as well as higher expense for issued bonds. Net fee and commission income rose mainly on the back of higher securities and payment fees. Net trading result and gains/losses from financial instruments at FVPL decreased on valuation effects. Operating expenses increased due to higher IT expenses, which was partly compensated by the lower contribution to the deposit insurance fund of EUR 5 million (EUR 6 million). Overall, operating result increased slightly, and the cost/income ratio remained nearly stable. Impairment result from financial instruments improved due to lower allocations for new defaults. Other result improved mainly due to lower provisions for legal expenses. Overall, the net result attributable to owners of the parent increased.

## SAVINGS BANKS

in EUR million	1-3 25	1-3 26	Change
Net interest income	420	459	9.3%
Net fee and commission income	195	210	7.7%
Net trading result and gains/losses from financial instruments at FVPL	11	6	-49.9%
Operating income	636	686	7.9%
Operating expenses	-339	-355	4.7%
Operating result	296	330	11.4%
Cost/income ratio	53.4%	51.8%	
Impairment result from financial instruments	-39	-45	15.7%
Other result	-28	-4	-83.8%
Net result attributable to owners of the parent	22	28	24.4%
Return on allocated capital	12.8%	16.2%	

The Savings Banks segment includes those savings banks which are members of the Haftungsverbund (cross-guarantee system) of the Austrian savings banks sector and in which Erste Group does not hold a majority stake but which are fully controlled according to IFRS 10. The fully or majority owned savings banks Erste Bank Oesterreich, Tiroler Sparkasse and Sparkasse Hainburg are not part of the Savings Banks segment.

Net interest income increased due to lower expenses for customer deposits partially offset by lower income from the variable loan portfolio and placements of surplus liquidity driven by the decreased interest rate environment. Net fee and commission income increased on the back of higher payment and securities fees. The net trading result and gains/losses from financial instruments at FVPL decreased on valuation effects. Operating expenses increased due to higher personnel and IT expenses, partially compensated by a lower contribution to the deposit insurance fund of EUR 10 million (EUR 13 million). Overall, operating result increased and the cost/income ratio improved. Impairment result from financial instruments deteriorated mainly due to higher risk cost allocations for new defaults. The improvement of other result was driven mainly by the non-recurrence of last year's provisions for legal risks with regards to loan arrangement fees. Banking tax remained stable at EUR 5 million. Overall, the net result attributable to the owners of the parent increased.

## OTHER AUSTRIA

in EUR million	1-3 25	1-3 26	Change
Net interest income	153	141	-7.5%
Net fee and commission income	106	117	10.0%
Net trading result and gains/losses from financial instruments at FVPL	13	-1	n/a
Operating income	288	274	-4.8%
Operating expenses	-108	-108	0.0%
Operating result	180	166	-7.7%
Cost/income ratio	37.5%	39.3%	
Impairment result from financial instruments	8	2	-68.6%
Other result	1	2	63.5%
Net result attributable to owners of the parent	143	130	-9.1%
Return on allocated capital	20.2%	20.4%	

The Other Austria segment comprises the Corporates and Group Markets business of Erste Group Bank AG (Holding), Erste Group Immorent, Erste Asset Management and Intermarket Bank.

Net interest income decreased primarily due to a lower contribution of fixed income products and repo business in Group Markets, as well as a lower result of Erste Group Immorent, only partially compensated by higher loan volumes in Corporate business in Holding. Net fee and commission income improved mainly due to higher asset management fees, as well as higher securities fees on the debt capital market and custody business contribution. Net trading result and gains/losses from financial instruments at FVPL deteriorated on valuation effects. While operating income decreased, operating expenses remained stable. Thus operating result and the cost/income ratio deteriorated. The impairment result from financial instruments again posted a net release, albeit at a lower level mostly due lower recoveries and impairment releases. Other result improved due to lower provisions for commitments in the Corporate portfolio in Holding. Overall, the net result attributable to owners of the parent deteriorated.

## Central and Eastern Europe

### POLAND

in EUR million	1-3 26	Change
Net interest income	681	n/a
Net fee and commission income	128	n/a
Net trading result and gains/losses from financial instruments at FVPL	85	n/a
Operating income	901	n/a
Operating expenses	-359	n/a
Operating result	542	n/a
Cost/income ratio	39.8%	
Impairment result from financial instruments	-335	n/a
Other result	-88	n/a
Net result attributable to owners of the parent	24	n/a
Return on allocated capital	5.5%	

As of the first quarter of 2026, Poland is the eighth core market of Erste Group. Consequently, Poland (comprising Erste Bank Polska Group) was added as additional operating segment in the geographical area Central and Eastern Europe.

Several P&L line items were adversely affected by the bookings related to the purchase price allocation (PPA): net interest income by EUR -47 million (mainly unwinding of FV PPA adjustments related to securities) and operating expenses by EUR -66 million (amortisation of customer relationships and brand). Impairment result from financial instruments contains one-time allocation of the credit loss allowance of EUR 302 million. PPA bookings in net interest income and operating expenses are of a recurring nature.

### CZECH REPUBLIC

in EUR million	1-3 25	1-3 26	Change
Net interest income	366	392	7.1%
Net fee and commission income	128	140	9.2%
Net trading result and gains/losses from financial instruments at FVPL	30	49	63.4%
Operating income	527	584	10.8%
Operating expenses	-253	-269	6.5%
Operating result	274	315	14.7%
Cost/income ratio	48.0%	46.1%	
Impairment result from financial instruments	-13	2	n/a
Other result	-23	-11	-50.7%
Net result attributable to owners of the parent	199	253	27.2%
Return on allocated capital	19.0%	22.8%	

The segment analysis is done on a constant currency basis. The CZK appreciated by 3.0% against the EUR in the reporting period. Net interest income in the Czech Republic segment (comprising Česká spořitelna Group) increased on a positive contribution of lending business, lower expenses for customer deposits and higher yields on bond investments, partially offset by lower income from placements at the central bank due to the decreased interest rate environment as well as higher expenses for issued bonds. The increase in net fee and commission income was mainly driven by higher fees from securities business. Net trading result and gains/losses from financial instruments at FVPL improved on positive valuation effects. Operating expenses increased mainly due to higher personnel and IT costs. Contributions into the deposit insurance fund were unchanged at EUR 17 million. Overall, the operating result increased and the cost/income ratio improved. Impairment result from financial instruments improved benefitting from net releases mainly on a positive development of the Corporate portfolio. Other result improved on the non-recurrence of last year's negative impact from the deconsolidation of a subsidiary and non-recurrence of last year's selling losses from bonds although the contribution to the resolution fund increased slightly to EUR 7 million (EUR 6 million). Altogether, these developments resulted in a higher net result attributable to the owners of the parent.

## SLOVAKIA

in EUR million	1-3 25	1-3 26	Change
Net interest income	145	164	13.0%
Net fee and commission income	59	66	12.3%
Net trading result and gains/losses from financial instruments at FVPL	6	9	49.6%
Operating income	212	241	13.8%
Operating expenses	-94	-98	4.3%
Operating result	118	143	21.4%
Cost/income ratio	44.3%	40.6%	
Impairment result from financial instruments	-20	-23	13.1%
Other result	0	0	>100.0%
Net result attributable to owners of the parent	65	82	26.3%
Return on allocated capital	18.8%	22.1%	

Net interest income in the Slovakia segment (comprising Slovenská sporiteľňa Group) increased due to higher customer loan volumes and repricing of fixed rate loans as well as lower expenses for customer deposits. These effects were partially offset by lower income from central bank placements and higher expenses for issued bonds. Net fee and commission income increased on the back of higher payment and securities fees. Net trading result and gains/losses from financial instruments at FVPL increased due to valuation effects. Operating expenses went up mainly due to higher personnel expenses. The contributions into the deposit insurance fund rose to EUR 4 million (EUR 3 million). Operating result and the cost/income ratio improved. Impairment result from financial instruments deteriorated due to higher allocations in the retail business. Other result remained stable. The banking tax, booked in the taxes on income line, amounted to EUR 16 million (EUR 15 million). Overall, the net result attributable to the owners of the parent increased.

## ROMANIA

in EUR million	1-3 25	1-3 26	Change
Net interest income	201	184	-8.6%
Net fee and commission income	57	60	4.4%
Net trading result and gains/losses from financial instruments at FVPL	24	25	1.7%
Operating income	284	269	-5.2%
Operating expenses	-109	-111	1.9%
Operating result	175	159	-9.6%
Cost/income ratio	38.3%	41.1%	
Impairment result from financial instruments	-12	-36	>100.0%
Other result	-25	-24	-3.7%
Net result attributable to owners of the parent	111	79	-28.8%
Return on allocated capital	19.2%	14.6%	

The segment analysis is done on a constant currency basis. The RON depreciated by 2.4% against the EUR in the reporting period. Net interest income in the Romania segment (comprising Banca Comercială Română Group) decreased on a lower contribution from loans driven by lower market interest rates as well as higher expense for customer deposits impacted by higher volumes. Net fee and commission income went up mainly on higher payment, securities and insurance brokerage fees. The net trading result and gains/losses from financial instruments at FVPL increased due to improved contribution from FX business. Operating expenses rose mainly due to higher personnel, IT and marketing expenses, while no contribution into the deposit insurance fund was paid (2025: EUR 4 million). Consequently, both operating result and the cost/income ratio deteriorated. The impairment result from financial instruments worsened mostly due to new defaults. Other result improved only moderately on the discontinuation of payments into the resolution fund as the target level was reached (2025: EUR 8 million) as the banking tax increased to EUR 16 million (EUR 10 million). Overall, the net result attributable to the owners of the parent decreased.

## HUNGARY

in EUR million	1-3 25	1-3 26	Change
Net interest income	107	118	10.4%
Net fee and commission income	83	94	13.7%
Net trading result and gains/losses from financial instruments at FVPL	12	2	-82.5%
Operating income	203	216	6.1%
Operating expenses	-82	-95	16.2%
Operating result	122	121	-0.6%
Cost/income ratio	40.2%	44.0%	
Impairment result from financial instruments	4	6	36.8%
Other result	-84	-157	87.6%
Net result attributable to owners of the parent	33	-35	n/a
Return on allocated capital	11.0%	-11.3%	

The segment analysis is done on a constant currency basis. The HUF appreciated by 5.1% against the EUR in the reporting period. Net interest income in the Hungary segment (comprising Erste Bank Hungary Group) was positively impacted by higher loan volumes and higher income from securities investments partially offset by higher expenses for customer deposits. Net fee and commission income rose mainly on higher securities and payment fees. Net trading result and gains/losses from financial instruments at FVPL declined due to valuation effects. Operating expenses increased due to higher personnel and IT expenses. The contribution into the deposit insurance fund amounted to EUR 9 million (EUR 8 million). Overall, operating result remained by and large stable, while the cost/income ratio deteriorated. Impairment result from financial instruments still benefited from net releases. The deterioration of the other result was primarily driven by the higher banking tax amounting to EUR 120 million (EUR 48 million), it comprised the regular banking tax and a windfall profit tax of EUR 98 million (EUR 28 million) – both already for the full year 2026. Financial transaction tax went up to EUR 32 million (EUR 30 million). The contribution to the resolution fund remained at EUR 2 million. Overall, the net result attributable to the owners of the parent decreased.

## CROATIA

in EUR million	1-3 25	1-3 26	Change
Net interest income	102	109	6.8%
Net fee and commission income	33	29	-12.4%
Net trading result and gains/losses from financial instruments at FVPL	5	5	-1.6%
Operating income	142	145	1.8%
Operating expenses	-73	-72	-1.8%
Operating result	69	73	5.6%
Cost/income ratio	51.5%	49.7%	
Impairment result from financial instruments	9	7	-21.8%
Other result	1	116	>100.0%
Net result attributable to owners of the parent	45	117	>100.0%
Return on allocated capital	23.6%	53.6%	

Net interest income in the Croatia segment (comprising Erste Bank Croatia Group) increased driven by higher loan volumes and lower interest expenses for customer deposits, partly offset by lower interest income from placements at the central bank. Net fee and commission income decreased mainly on lower payment fees due to the sale of Erste Card Club. Net trading result and gains/losses from financial instruments at FVPL remained stable. Operating expenses were also by and large stable. The contribution into the deposit insurance fund remained unchanged at EUR 1 million. Overall, operating result increased and the cost/income ratio improved. Impairment result from financial instruments still benefited from net releases, albeit at a lower level. Other result improved notable on the selling gains from Erste Card Club. Consequently, the net result attributable to the owners of the parent increased significantly.

## SERBIA

in EUR million	1-3 25	1-3 26	Change
Net interest income	28	26	-5.1%
Net fee and commission income	7	7	5.6%
Net trading result and gains/losses from financial instruments at FVPL	3	3	1.0%
Operating income	39	39	-1.0%
Operating expenses	-23	-25	8.4%
Operating result	16	13	-15.1%
Cost/income ratio	59.7%	65.4%	
Impairment result from financial instruments	-3	-2	-25.1%
Other result	0	-4	n/a
Net result attributable to owners of the parent	10	5	-54.5%
Return on allocated capital	15.3%	6.6%	

The segment analysis is done on a constant currency basis. The Serbian Dinar (RSD) remained largely stable against the EUR in the reporting period. Net interest income in the Serbia segment (comprising Erste Bank Serbia Group) declined due to higher interest rates on deposits. Net fee and commission income benefitted from higher payment fees. Net trading result and gains/losses from financial instruments at FVPL remained stable. Operating expenses rose mainly due to higher IT depreciation and higher personnel costs. The deposit insurance contribution decreased to EUR 1,1 million (EUR 1,5 million). Consequently, operating result decreased, and the cost/income ratio worsened. Impairment result from financial instruments improved, reflecting the non-recurrence of the one-off allocation related to a significant default and due to rating upgrades in the corporate portfolio. Other result worsened mainly due to the contribution to the resolution fund introduced in 2026 in the amount of EUR 4 million. Overall, the net result attributable to owners of the parent decreased.

# Condensed interim consolidated financial statements

Interim report 1 January to 31 March 2026

## Consolidated statement of income

in EUR million	Notes	1-3 25	1-3 26

Interest received	5,252	5,859
Dividends received	3	4
Interest paid	-3,218	-3,150

Cash and cash equivalents are equal to the amount in the balance sheet line item 'Cash and cash balances'. Within the cash flow from investing activities, the cash inflows and outflows related to equity transactions have been presented separately to enhance transparency.

# Condensed notes to the interim consolidated financial statements

1 January to 31 March 2026

## BASIS OF PREPARATION

The condensed consolidated interim financial statements (“interim financial statements”) of the group of Erste Group Bank AG (“Erste Group”) for the period from 1 January to 31 March 2026 were prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”) and are presented in accordance with the requirements of IAS 34 “Interim Financial Reporting”.

These interim financial statements were neither audited nor reviewed by an auditor.

## CONSOLIDATION SCOPE

### IFRS consolidation scope - evolution of number of entities and funds included

As of 31 December 2025	281
<b>Additions</b>	
Entities newly added to the scope of consolidation	11
<b>Disposals</b>	
Companies sold or liquidated	-1
Mergers	0
As of 31 March 2026	291

In May 2025, Erste Group Bank AG and Banco Santander S.A. entered into an agreement under which Erste Group acquired a 49% stake in Santander Bank Polska Group S.A., a publicly listed universal bank operating in Poland, and a 50% stake in Santander Towarzystwo Funduszy Inwestycyjnych S.A., an asset management company. The transaction was closed on 9 January 2026, the acquisition date, when Erste Group obtained control of the companies. The transaction increased the balance sheet total of Erste Group by EUR 70.391 million as of the acquisition date. For further details, please refer to disclosures in *Note 36 Agreement on the acquisition of Erste Bank Polska*.

## ACCOUNTING AND MEASUREMENT METHODS

The interim financial statements have been prepared in accordance with IAS 34 “Interim Financial Reporting” and are presented in euro, which is the functional currency of the parent company. The interim financial statements do not include all the information and disclosures required in the annual consolidated financial statements. Therefore, the interim financial statements should be read in conjunction with Erste Group’s consolidated financial statements as of 31 December 2025.

When preparing the interim financial statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management and will seldom equal the estimated results. Judgements, estimates and assumptions applied in the interim financial statements, including the key sources of estimation uncertainty, were the same as those applied in the group’s last annual financial statements for the year ended 31 December 2025, with the exception of the calculation of the current income taxes for the interim reporting period for which the estimated effective tax rate for the group is applied.

## 1. Net interest income

in EUR million	1-3 25	1-3 26
Interest income	3,549	4,080
Financial assets at AC	3,450	3,885
Financial assets at FVOCI	99	195
Other similar income	770	695
Non-trading financial assets at FVPL	26	41
Financial assets HfT	663	549
Hedge accounting derivatives, interest rate risk	7	1
Other assets	69	102
Negative interest from financial liabilities	4	3
<b>Interest and other similar income</b>	<b>4,318</b>	<b>4,775</b>
Interest expenses	-1,675	-1,473

Deferred income	128	159
Sundry liabilities	2,577	4,219
<b>Other liabilities</b>	<b>2,706</b>	<b>4,378</b>

## 28. Segment reporting

Erste Group's segment reporting is based on IFRS 8 Operating Segments, which adopts the management approach. Accordingly, segment information is prepared on the basis of internal management reporting that is regularly reviewed by the chief operating decision maker to assess the performance of the segments and make decisions regarding the allocation of resources. Within Erste Group the function of the chief operating decision maker is exercised by the Management Board. Erste Group uses a matrix organisational structure with geographical segmentation and business segments. Since the chief operating decision maker performs the steering primarily based on geographical segments, those are defined as operating segments according to IFRS 8. In order to provide more comprehensive information, the performance of the business segments is reported additionally.

### Geographical segmentation (operating segments)

For the purpose of segment reporting geographical segments are defined as operating segments, for which the information is presented on the basis of the booking entity's location (not the country of risk). In case of information regarding a partial group, the allocation is based on the location of the respective parent entity according to the local management responsibility.

Geographical areas are defined according to the core markets in which Erste Group operates. Based on the locations of the banking and other financial institution participations, the geographical areas consist of two core markets, Austria and Central and Eastern Europe and a residual segment Other that comprises the remaining business activities of Erste Group outside its core markets as well as the reconciliation to the consolidated accounting result.

Since the beginning of 2026, there is an addition in the geographical area Central and Eastern Europe due to the acquisition of Erste Bank Polska. For further details, please refer to [Note 36](#).

Geographical segmentation – operating segments									
Austria			Central and Eastern Europe				Other		
EBOe & Subsidiaries	Savings Banks	Other Austria	Poland	Czech Republic	Slovakia	Romania			
			Hungary	Croatia	Serbia				

The geographical area Austria consists of the following three operating segments:

- The **Erste Bank Oesterreich & Subsidiaries** (EBOe & Subsidiaries) segment comprises Erste Bank der oesterreichischen Sparkassen AG (Erste Bank Oesterreich) and its main subsidiaries (e.g. sBausparkasse, Tiroler Sparkasse, Sparkasse Hainburg). Salzburger Sparkasse was merged with Erste Bank Oesterreich as of 1 August 2025.
- The **Savings banks** segment includes those savings banks which are members of the Haftungsverbund (cross-guarantee system) of the Austrian savings banks sector and in which Erste Group does not hold a majority stake but which are fully controlled according to IFRS 10. The fully or majority owned Erste Bank Oesterreich, Tiroler Sparkasse, and Sparkasse Hainburg are not part of the Savings Banks segment.
- The **Other Austria** segment comprises Erste Group Bank AG (Holding) with its Corporates and Group Markets business, Erste Group Immorent GmbH, Erste Asset Management GmbH and Intermarket Bank AG.

The geographical area Central and Eastern Europe (CEE) consists of seven operating segments covering Erste Group's banking subsidiaries located in the respective CEE countries:

- **Poland** (comprising Erste Bank Polska Group)
- **Czech Republic** (comprising Česká spořitelna Group)
- **Slovakia** (comprising Slovenská sporiteľňa Group)
- **Romania** (comprising Banca Comercială Română Group)
- **Hungary** (comprising Erste Bank Hungary Group)
- **Croatia** (comprising Erste Bank Croatia Group)
- **Serbia** (comprising Erste Bank Serbia Group).

The residual segment **Other** covers mainly centrally managed activities and items that are not directly allocated to other segments. It comprises the corporate center of Erste Group Bank AG (and thus dividends and the refinancing costs from participations, general administrative expenses), internal service providers (facility management, IT, procurement), the banking tax of Erste

Group Bank AG as well as free capital of Erste Group (defined as the difference of the total average IFRS equity and the average economical equity allocated to the segments). Asset/Liability Management of Erste Group Bank AG as well as the reconciliation to the consolidated accounting result (e.g. intragroup eliminations, dividend eliminations) are also part of the segment Other. Intragroup eliminations are equal to the Intragroup eliminations shown in the business segmentation view (see the table 'Business segments (2)').

## Business segmentation

Apart from geographical segments, which are Erste Group's operating segments, business segments are reported as well.

**Retail.** The Retail segment comprises the business with private individuals, micros and free professionals within the responsibility of account managers in the retail network. This business is operated by the local banks in cooperation with their subsidiaries such as leasing and asset management companies with a focus on simple products ranging from mortgage and consumer loans, investment products, current accounts, savings products to credit cards and cross selling products such as leasing, insurance and building society products.

**Corporates.** The Corporates segment comprises business done with corporate customers of different turnover size (small and medium-sized enterprises and Large Corporate customers) as well as commercial real estate and public sector business.

**Group Markets.** The Group Markets (GM) segment comprises trading and markets services as well as customer business with financial institutions. It includes all activities related to the trading books of Erste Group, including the execution of trade, market making and short-term liquidity management. In addition, it comprises business connected with servicing financial institutions as clients.

**Asset/Liability Management & Local Corporate Center.** The Asset/Liability Management & Local Corporate Center (ALM & LCC) segment includes all asset/liability management functions – local and of Erste Group Bank AG (Holding) – as well as the local corporate centers which comprise all non-core banking business activities such as internal service providers and reconciliation items to local entity results. The corporate center of Erste Group Bank AG is included in the Group Corporate Center segment.

**Savings Banks.** The Savings Banks segment is identical to the operating segment Savings banks.

**Poland.** Poland (Erste Bank Polska) segment is identical to the operating segment Poland in 2026 since the necessary information related to business segments of Erste Bank Polska according to Erste Group segmentation rules is not available yet.

**Group Corporate Center.** The Group Corporate Center (GCC) segment covers mainly centrally managed activities and items that are not directly allocated to other segments. It comprises the corporate center of Erste Group Bank AG (and thus dividends and the refinancing costs from participations, general administrative expenses), internal service providers (facility management, IT, procurement), the banking tax of Erste Group Bank AG as well as free capital of Erste Group (defined as the difference of the total average IFRS equity and the average economical equity allocated to the segments).

**Intragroup Elimination.** Intragroup Elimination (IC) is not defined as a segment but is the reconciliation to the consolidated accounting result. It includes intragroup eliminations between participations of Erste Group (e.g. intragroup funding, internal cost charges). Intragroup eliminations within partial groups are disclosed in the respective segments.

Dividend elimination between Erste Group Bank AG and its fully consolidated subsidiaries is performed in Group Corporate Center. Consolidation differences arising between the segments, which are eliminated over the lifespan of the underlying transaction, are part of Group Corporate Center.

## Measurement

The profit and loss statement of the segment report is based on the measures reported to the Erste Group Management Board for the purpose of allocating resources to the segments and assessing their performance. Management reporting as well as the segment report of Erste Group are based on IFRS. Accounting standards and methods as well as measurements used in segment reporting are the same as for the consolidated financial statements of accounting.

Interest revenues are not reported separately from interest expenses for each reportable segment. Those measures are reported on the net basis within the position 'Net interest income' as interest revenues and interest expenses are neither included into the measure of segment profit or loss reviewed by the chief operating decision maker nor otherwise regularly provided to the chief operating decision maker. Chief operating decision maker relies solely on net interest income to assess the performance of the segments and make decisions about resources to be allocated to the segments. Net fee and commission income and Other operating result are reported on a net basis according to the regular reporting to the chief operating decision maker.

Capital consumption per segment is regularly reviewed by the management of Erste Group to assess the performance of the segments. The average allocated capital is determined by the credit risk, market risk, operational risk and business strategic risk. According to the regular internal reporting to Erste Group Management Board, total assets and total liabilities as well as risk weighted assets and allocated capital are disclosed per segment. Total average allocated capital for the Group equals average total equity of the Group.

For measuring and assessing the profitability of segments within Erste Group, such key measures as return on allocated capital and cost/income ratio are used. Return on allocated capital is defined as net result for the period before minorities in relation to the average allocated capital of the respective segment. Cost/income ratio is defined as operating expenses (general administrative expenses) in relation to operating income (total of net interest income, net fee and commission income, dividend income, net trading result, gains/losses from financial instruments measured at fair value through profit or loss, net result from equity method investments, rental income from investment properties and other operating lease).

## 29. Risk management

A core function of a bank is taking risks in a conscious and selective manner and professionally steering those risks. Adequate risk policy and risk strategy is essential to a bank's fundamental financial health and operational business success. Concerning risk policy and strategy as well as regarding risk management organisation, reference is made to the note of the same name in the annual report 2025.

### Credit risk

For the disclosure of asset quality Erste Group assigns each customer to one of the following four risk categories:

**Low risk.** Typically, regional customers with well-established and rather long-standing relationships with Erste Group or large internationally recognised customers. Very good to satisfactory financial position and low likelihood of financial difficulties relative to the respective market in which the customers operate. Retail clients having long relationships with the bank, or clients with a wide product pool use. No relevant late payments currently or in the most recent 12 months. New business is generally done with clients in this risk category.

**Management attention.** Vulnerable non-retail clients, who may have overdue payments or defaults in their credit history or may encounter debt repayment difficulties in the medium term. Retail clients with possible payment problems in the past triggering early collection reminders. These clients typically have a good recent payment history.

**Substandard.** The borrower is vulnerable to short-term negative financial and economic developments and shows an elevated probability of failure. In some cases, restructuring measures are possible or already in place. Generally, such loans are managed in specialised risk management departments.

**Non-performing.** One or more of the default criteria under Article 178 of the CRR are met, which include full repayment unlikely, interest or principal payments on a material exposure more than 90 days past due, restructuring resulting in a loss to the lender, realisation of a loan loss, or initiation of bankruptcy proceedings. Erste Group applies the customer view for all customer segments, including retail clients; if an obligor defaults on one deal, then the customer's performing transactions are classified as non-performing as well. All non-performing exposures are also defaulted.

### Credit risk exposure

Credit risk exposure relates to the sum of the following balance sheet items:

- \_ cash and cash balances - demand deposits to credit institutions;
- \_ instruments (derivatives and debt securities) held for trading (HfT);
- \_ non-trading debt instruments at fair value through profit or loss (FVPL);
- \_ debt instruments at fair value through other comprehensive income (FVOCI);
- \_ debt instruments at amortised cost (AC), other than trade and other receivables;
- \_ trade and other receivables (for disclosure purposes in the tabular summaries below, any contract assets are also included in this category);
- \_ finance lease receivables;
- \_ debt instruments held for sale in disposal groups;
- \_ positive fair value of hedge accounting derivatives;
- \_ off-balance sheet exposures (primarily financial guarantees and undrawn loan commitments).

The credit risk exposure equates the gross carrying amount (or nominal value in the case of off-balance sheet positions) excluding:

- \_ credit loss allowances for financial assets;
- \_ credit loss allowances for loan commitments and financial guarantees;
- \_ provisions for other commitments;
- \_ any collateral held (including risk transfer to guarantors);
- \_ netting effects;
- \_ other credit enhancements;
- \_ credit risk mitigating transactions.

In the reporting period, the credit risk exposure increased by 24% or EUR 98.3 billion, mainly due to integration of Poland segment portfolio.

## Reconciliation between the gross carrying amount and the carrying amount of the credit risk exposure components

Credit loss allowances comprise impairments for financial assets measured at amortised cost (including finance lease and trade and other receivables) and at fair value through other comprehensive income (FVOCI), as well as credit loss allowances and provisions for off-balance sheet exposures. Adjustments refer to the fair value changes of the carrying amount for financial assets at FVOCI.

Starting January 2026, Erste Group has updated its internal industry segmentation in line with the implementation of NACE Rev. 2.1. The changes are designed to align more closely with market practice and to better reflect economic interdependencies. The main changes are:

- \_ Industry "Natural Resources & Commodities" has been split and subsegments allocated to different industries, with "Agriculture" remaining as separate industry;
- \_ Industry "Energy" has been split into "Conventional Fuels & Petrochemicals" and "Utilities";
- \_ "Non-Profit Housing Associations" has been separated from "Real Estate" as distinct industry.

The geographic analysis of credit risk exposure is based on the country of risk of borrowers and counterparties. It also includes obligors domiciled in other countries if the economic risk exists in the respective country of risk. Accordingly, the distribution by regions differs from the composition of the credit risk exposure by geographical segments of Erste Group.

Portfolio quality remained resilient in the first quarter of 2026, with no indication of underlying credit deterioration. The distribution of credit risk exposure across risk categories has been affected by the integration of Poland segment leading to increase in all risk categories. Additionally, the distribution was influenced by the updated method of assigning the external customer ratings to the internal PDs, reflecting the updated one-year default rates for the agency ratings and latest PD methodology. Overall, these developments resulted in decrease of “Management Attention” exposure share by 1 percentage point and increase of “Substandard” exposure share by 0.8 percentage points compared to December 2025.

Stage 1 and Stage 2 comprise not impaired credit risks, while Stage 3 includes impaired credit risks. POCI (purchased or originated credit impaired) exposure consists of credit risks already impaired when purchased or originated.

The defaulted part of POCI amounted to EUR 908 million (2025: EUR 161 million), the non-defaulted part to EUR 200 million (2025: EUR 187 million).

## Measurement of expected credit loss (ECL)

The general principles and standards for credit loss allowances are governed by internal policies in Erste Group. According to IFRS 9, credit loss allowances are calculated for all components of credit risk exposures which are measured at amortised cost (AC) or at fair value through other comprehensive income. They include debt securities, loans and advances, demand deposits on nostro accounts with commercial banks as well as finance lease and trade receivables. In addition, credit loss allowances are calculated for loan commitments and financial guarantees if they meet the applicable IFRS 9 definitions.

For more details, please refer to Erste Group's annual report 2025, group consolidated financial statements, risk and capital management notes.

Considering the acquisition of Santander Bank Polska S.A. in January 2026, any minor differences in classification into stages or in ECL measurement will be harmonized over the course of the year with the Erste Group approach.

## Scenarios used in forward looking information and Crises Effects

### Overview on scenarios used in forward-looking information

#### INCORPORATION OF FORWARD-LOOKING INFORMATION

Parameters are determined to reflect the risk as a 'point-in-time' measure and with consideration of forward-looking information (FLI). This results in using a baseline forecast and several alternative scenarios for selected macroeconomic variables. The alternative scenarios are derived, together with their weights of scenario outcome, as a deviation from baseline forecasts. The baseline forecasts are, with few exceptions, internally determined by Erste Group's research department. Given multiple scenarios, the 'neutral' PDs (and partially included in LGDs) are adjusted using macro models that link relevant macroeconomic variables with risk drivers. The same macro-shift models as for external and internal stress test are used. Forward-looking information is incorporated for first three years of ECL measurement. Measurement of the parameters for the remaining lifetime returns to through-the-cycle observations immediately in year four.

In the first quarter of 2026, the FLI concept applied in Poland was updated to align with the Erste Group methodology. For the remaining entities, the FLI applied in the ECL framework were not updated during the period. Erste Group assessed that the existing FLI adequately reflect the forecasts of macroeconomic variables development observed during this period, including the moderation in Eurozone economic activity in 2026 compared with 2025.

Overall, the Eurozone economy remains broadly resilient, although the growth environment has become more challenging than previously anticipated. The economic activity continues to be primarily supported by domestic demand, underpinned by a resilient labour market, improving real incomes, and sustained public expenditure, particularly in infrastructure and defence. At the same time, the near-term economic outlook has softened, as geopolitical tensions, including the conflict involving Iran, have contributed to higher oil and gas prices, increased uncertainty, and adverse effects on confidence, consumption, and investment. For more details on the macroeconomic assumptions incorporated in FLI, please refer to Erste Group's annual report 2025, group consolidated financial statements, risk and capital management notes.

The next regular FLI review is planned in the second quarter of 2026.

#### Overview of Baseline, Upside and Downside scenarios

Below Erste Group is summarizing expected development of the GDP for all regions, all scenarios and scenario weights, as main indicator of the macro-economic situation. In case of the central model for Group (Large) Corporate clients, the considered GDP scenarios are the same as shown below for the standalone countries, however including GDP predictions for Germany.

Additionally, Erste is disclosing the most relevant variables for the macro-shift model in the most significant regions. Austria, Czechia, Poland, Slovakia and Romania are presented as they have the highest share of credit risk exposure, expected credit loss and the highest share of FLI component in the expected credit loss measurement. Macro-shift models are calibrated for the three main sub-portfolios: private individuals, micro enterprises and another corporate business. Models' calibration and variables disclosed below are incorporated into expected credit loss measurement as of 31 March 2026. The baseline and weighted scenario outcome for the major variables is disclosed in the tabular format for the years 2026-2028.

## Baseline, upside and downside scenarios of GDP growth by geographic region

### Collective assessment

In addition to standard SICR assessment, Erste Group applied collective SICR assessment, i.e., transfer into Stage 2 based on pre-defined portfolio characteristics, due to emerging risks not covered by standard models. This approach is aligned with all affected entities and business lines and approved by the respective governance bodies of Erste Group. It requires, after the assessment of the outliers from the common portfolio characteristics, to have exemptions from the collective SICR assessment, if properly documented why they would behave differently than the rest of the portfolio.

In March 2026, Erste Group applied collective staging assessment (industry stage overlays), that had been implemented in 2024. This approach means that rules for transferring into stage 2 are defined as a combination, in case of industries selected in line with industry strategy, to ensuring that it reflects risks and changes in the risk assessment which our portfolio is exposed to, and one-year IFRS PDs.

In the first quarter of 2026, Erste Group has started to identify the industries in the scope of overlays based on the NACE 2.1 classification codes, resulting into ECL allocation in amount of EUR 1.9 million.

Out of the overall credit risk exposure of EUR 515 billion (2025: EUR 417 billion), portfolio under collective staging assessment (industry stage overlays) represents EUR 53 billion, thereof EUR 13 billion is in Stage 2 (out of which EUR 4 billion due to applying rules for industry stage overlays).

As of March 2026, industry overlays have not been applied in Poland. The rollout of these overlays is planned for a subsequent phase, aligned with the inclusion of Poland in the Industry Strategy.

In addition, local risk management may apply a local SICR collective assessment when it is determined that the recalibration of the PD model, the macro-shift FLI model, or the scoring model does not sufficiently reflect current economic conditions, such as developments in inflation, interest rates, or unemployment.

In 2022, local risk management in Czechia and Croatia assessed that the recalibration of the macro-shift FLI model for private individuals did not sufficiently reflect the current environment. Consequently, a local SICR collective assessment for private individuals was introduced. As of 31 March 2026, the exposure in Stage 2 resulting from this collective assessment amounts to EUR 1 billion, with an allocated ECL to EUR 15 million (2025: exposure of EUR 1 billion, ECL of EUR 17 million).

In addition, at the same time, in Croatia, following the internal validation of the scoring model for private individuals, another type of local SICR collective assessment is applied. As of 31 March 2026, the exposure in Stage 2 due to this collective assessment amounts to EUR 362 million and an allocated ECL to EUR 12 million (2025: exposure of EUR 366 million, ECL of EUR 12 million).

## EFFECT ON EXPECTED CREDIT LOSS

The analysis tables below present the effects of the collective SICR assessment and FLI on both exposure migration to Stage 2 and the resulting increase of ECL. Additional sensitivities to the baseline, upside and downside scenarios are simulated. Effects on geographical segments are disclosed.

As of 31 March 2026, the exposure classified in Stage 2 as a result of the application of collective SICR assessment rules (industry stage overlays) amounted to EUR 3,996 million (2025: EUR 3,784 million), with additional ECL allocated in the amount of EUR 81 million (2025: EUR 71 million).

As described above, the FLI were not reassessed in the first quarter of 2026. Nevertheless, Stage 2 exposures identified as a result of the application of FLI increased to EUR 3,391 million as of March 2026 (2025: EUR 2,942 million). This increase in Stage 2 exposure correspondingly impacted the level of ECL allocated in Stage 2 due to FLI, which amounted to EUR 287 million (2025: EUR 265 million). On ECL side, the increase of EUR 22 million was driven by Poland acquisition and portfolio development in Austria.

Scenario simulation presents sensitivity analyses taking into consideration only changes due to the different values of PDs, if baseline, upside or downside FLI scenarios had 100% weight. Sensitivities of these scenarios are calculated in comparison to current production - weighted scenarios FLI shifted - PDs (weights and scenarios are disclosed in the 'Incorporation of forward-looking information' section above). Both staging and resulting ECL were simulated with the scenario PDs.

The incorporation of 100% baseline scenario instead of the currently applied weighted scenario outcome would lead to a decrease of Stage 2 exposure by EUR 243 million (2025: EUR 289 million), resulting in an ECL drop by EUR 21 million (2025: EUR 19 million).

The downside scenario would lead to additional EUR 3,929 million (2025: EUR 3,905 million) of exposure migration to Stage 2 in comparison with scenario weighted FLI, resulting in ECL increase of EUR 322 million (2025: EUR 294 million).

For the ECL change a positive sign (+) equals a release while a negative sign (-) equals an allocation. Values presented sensitivities are results of internal simulations.

## Loans and advances to customers

The tables on the following pages present the structure of the customer loan book, excluding loans to central banks and credit institutions broken down by different categories. Loans and advances to customers comprise:

- \_ loans and advances to customers at FVPL;
- \_ loans and advances to customers at AC;
- \_ finance lease receivables;
- \_ trade and other receivables.

The presentation is by gross carrying amount not taking into consideration loan loss allowances and collateral.

In the following tables, the non-performing loans and advances to customers divided by segments are contrasted with allowances for customer loans (all allowances for loans and advances to customers within the scope of IFRS 9) and the collateral for non-performing loans (NPL). The NPL ratio, the NPL coverage ratio (excluding collateral) and the NPL collateralisation ratio are also included.

Total gross customer loans, total non-performing loans and total collateral include both AC and FVPL portfolios.

The NPL ratio of loans and advances to customers is calculated by dividing the gross carrying amount of non-performing loans and advances to customers by the total gross carrying amount of loans and advances to customers. Consequently, it differs from the NPE ratio in section 'Credit risk exposure'. Collaterals for non-performing loans mainly consist of real estates.

The NPL coverage ratio is calculated by dividing total loss allowances by the gross carrying amount of the non-performing loans and advances to customers. Collateral is not considered.

## Non-performing loans and advances to customers by business segment and coverage by loan loss allowances and collateral

'CEE-LCY' refers to the CEE geographical segment view where the local currency is the currency of the respective country (e.g., CZK in Czechia, RON in Romania etc.).

### Market risk

The following table shows the value at risk of the trading book at the 99% confidence level using equally weighted market data and with a holding period of one day.

in EUR million	Dec 25	Mar 26
Interest	2.3	2.1
Currency	0.8	1.5
Shares	1.2	1.5
Commodity	0.3	1.1
Volatility	0.6	1.1
<b>Total</b>	<b>2.7</b>	<b>3.0</b>

The method used is subject to limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved. This restriction applies to the inclusion of credit spreads in the calculation of the VaR. Issuer specific spreads are applied to sovereign issuers, while sector specific spreads are applied to non-sovereign issuers.

### Liquidity risk

For 2026, Erste Group Bank AG budgeted long-term issuance in the amount of EUR 5.8 billion. In the first three months about EUR 2.8 billion were issued, thereof three benchmark bonds (senior preferred, covered bonds and Tier 2).

### Leverage ratio

The leverage ratio represents the relationship between core capital (tier 1) and the leverage exposure according to Article 429 Capital Requirements Regulation (CRR). Essentially, the leverage exposure represents the sum of unweighted on- and off-balance-sheet positions considering valuation and risk adjustments as defined within the CRR.

As of 31 March 2026, the leverage ratio for Erste Group Bank AG at consolidated level amounted to 6.4%, comfortably above the 3.0% minimum requirement defined in Article 92 Capital Requirements Regulation (CRR). Tier 1 capital amounted to EUR 30.2 billion at the reference date, while total leverage exposure stood at EUR 473.9 billion.

The calculation and disclosure of the leverage ratio are based on the European Commission's Delegated Regulation (EU) 2015/62 of 10 October 2014 and on the Regulation (EU) 2024/1623 (CRR3) of the European Parliament and of the Council of 31 May 2024.

## 30. Related-party transactions

The foundation DIE ERSTE oesterreichische Spar-Casse Privatstiftung (Privatstiftung) controls a total of 26.50% interest in Erste Group Bank AG. Privatstiftung is the largest single investor in Erste Group Bank AG. At the end of the reporting period, Erste Group had, in relation to Privatstiftung, accounts payable of EUR 41 million (EUR 65 million) and no accounts receivable. Privatstiftung held bonds issued by Erste Group of EUR 46 million (EUR 47 million). From the mentioned transactions, interest expenses for Erste Group amounted to EUR 1 million (EUR 1 million). Erste Group did not receive fee and commission income or rental income.

## 31. Contingent liabilities - legal proceedings

On 6 April 2026, BCR received an investigation report from the Romanian Competition Council alleging anticompetitive conduct in connection with possible agreements and/or concerted practice regarding the coordinated fixing of the ROBOR reference rate among the ten panel banks (including BCR), covering the period since November 2018. The investigation report - which does not represent the final decision of the authority - proposes a fine of up to 10% of BCR's annual turnover (the statutory maximum). BCR is convinced in the correctness of its market conduct and, in the eventuality the Romanian Competition Council upholds such allegations, will contest the findings and challenge them through all available legal means.

Other than the aforementioned matter in Romania, there have not been any material changes since year-end 2025 in the assessment of the influence of the outcome of the litigation cases in which Erste Group Bank AG and some of its subsidiaries are involved with respect of the financial and/or earnings situation of Erste Group.

## 32. Fair value of financial instruments

The measurement of fair value at Erste Group is based primarily on external sources of data (stock market prices or broker quotes in highly liquid market segments). Financial instruments for which the fair value is determined on the basis of quoted market prices are mainly listed securities and listed derivatives as well as liquid OTC bonds.

Where the fair values of financial assets and financial liabilities recorded on the balance sheet cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are derived from observable market data where possible, but where observable market data is not available judgement is required to establish fair values. Using of unobservable inputs is particularly relevant for models used for valuations of loans and unquoted equity investments. Disclosures on valuation models, the fair value hierarchy and fair values of financial instruments can be found subsequently.

For all financial instruments the fair value is measured on recurring basis.

### Financial instruments carried at fair value

#### DESCRIPTION OF VALUATION MODELS AND PARAMETERS

Erste Group uses valuation models that have been tested internally and for which the valuation parameters (such as interest rates, exchange rates, volatilities and credit spreads) have been determined independently.

**Loans.** Not SPPI compliant loans are to be valued at fair value. The methodology to compute fair value of these loans corresponds to the basic present value technique. For fair value through profit and loss designated loans the credit risk is recognized by adjusting contractual cash flows to come to expected cash flows accounting for customer's probability of default ('PD') and loss given default ('LGD'). These adjusted cash flows are then discounted by a yield curve which consists of a risk-free rate and a funding spread for senior unsecured issues. For fair value through other comprehensive income designated loans cash flows are discounted by a yield curve which consists of a risk-free rate plus the effective margin of the loan.

**Debt securities.** For plain vanilla (fixed and floating rate) debt securities the fair value is calculated by discounting the future cash flows using a discounting curve depending on the interest rate for the respective issuance currency and a spread adjustment. The spread adjustment is usually derived from the credit spread curve of the issuer. If no issuer curve is available the spread is derived from a proxy instrument and adjusted for differences in the risk profile of the instruments. If no close proxy is available, the spread adjustment is estimated using other information, including estimation of the credit spread based on internal ratings and PDs or management judgment. For more complex debt securities (e.g. including option-like features such as callable, cap/floor, index-linked) the fair value is determined using combinations of discounted cash flow models and more sophisticated modeling techniques including methods described for OTC-derivatives.

**Equity instruments.** For non-trading equity instruments which do not have quoted market prices in an active market the fair value is determined by standard valuation models using also unobservable input parameters. These models include the adjusted net asset value method, the simplified income approach, the dividend discount model and the comparable company multiple method.

The adjusted net asset method requires an investor to measure the fair value of the individual assets and liabilities recognized in an investee's statement of financial position as well as the fair value of any unrecognized assets and liabilities at the measurement date. The resulting fair values of the recognized and unrecognized assets and liabilities should therefore represent the fair value of the investee's equity.

The dividend discount model assumes that the price of equity instruments issued by an entity equals the present value of all its expected future dividends in perpetuity. Similar to the dividend discount model, the simplified income approach estimates the fair value based on the future income. However, it can be used also when only one year planned income is available. The simplified income approach and the dividend discount model discount future income and dividends using the cost of equity. The cost of equity is dependent on the risk-free rate, the market risk premium, the levered beta and the country risk premium. The levered beta is derived from the industry classification which is published and maintained by Damodaran.

In rare cases, techniques for non-trading equity instruments may also include comparable company multiple methods. These are valuation techniques that use prices and other relevant information generated by market transactions involving comparable company peers of an investee to derive a valuation multiple from which the indicated fair value of the investee's equity or enterprise value can be inferred.

**Liabilities.** For issued debt securities where the fair value cannot be retrieved from quoted market prices, the fair value is calculated by discounting the future cash flows. Significant input factors for the spread adjustment of Erste Group's own credit risk for the respective seniority class are credit spreads derived from liquid benchmark bonds and additional indications from external investments banks, which are provided on a regular basis. The applied spreads are validated on a regular basis from an independent Risk Management unit. In case of issued securities with structured features, optionality is taken into account as well when calculating the fair value.

**OTC-derivative financial instruments.** Derivative instruments traded in liquid markets (e.g. interest rate swaps and options, foreign exchange forward and options, options on listed securities and indices, credit default swaps and commodity swaps) are valued by using standard valuation models. These models include discounting cash flow models, option models of the Black-Scholes and Hull-White type as well as hazard rate models. Models are calibrated on quoted market data (including implied volatilities). Valuation models for more complex instruments also use Monte-Carlo simulation. For instruments in less liquid markets, data obtained from less frequent transactions or extrapolation techniques are used. For determining the fair value of collateralised derivatives a discounting interest rate reflecting the interest rate of the corresponding cash collateral is used.

Erste Group values derivatives at mid-market levels. To reflect the potential bid-ask-spread of the relevant positions an adjustment based on market liquidity is performed. The adjustment parameters depend on product type, currency, maturity, liquidity and notional size. Parameters are reviewed on a regular basis or in case of significant market moves.

Credit value adjustments (CVA) for counterparty risk and debit value adjustments (DVA) for own default credit risk are applied to OTC derivatives. For the CVA the adjustment is driven by the expected positive exposure of the derivative and the probability of default of the counterparty. The DVA is driven by the expected negative exposure of the derivative and Erste Group's probability of default. The modeling of the expected exposure is based on option replication strategies or Monte-Carlo simulation techniques.

The accumulated CVA-adjustments amounted to EUR 9 million (2025: EUR 9 million) and the total DVA-adjustment amounted to EUR 13 million (2025: EUR 10 million).

Based on an analysis carried out by Erste Group it was decided that for the valuation of OTC derivatives no Funding Value Adjustment ('FVA') would be considered.

## VALIDATION AND CONTROL

The responsibility for valuation of financial instruments measured at fair value is independent of the trading units. In addition, Erste Group has implemented an independent validation function in order to ensure separation between units responsible for model development, fair value measurement and validation. The aim of independent model validation is to evaluate model risks arising from the models' theoretical foundation, the appropriateness of input data (market data) and model calibration.

## Fair value hierarchy

Financial assets and financial liabilities measured at fair value are categorized under the three levels of the IFRS fair value hierarchy.

### LEVEL 1 OF THE FAIR VALUE HIERARCHY

Level 1 measurements include exchange traded derivatives (options), shares, government bonds as well as other bonds and funds, which are traded in highly liquid and active markets.

### LEVEL 2 OF THE FAIR VALUE HIERARCHY

In case a market quote is used for valuation but due to restricted liquidity the market does not qualify as active (derived from available market liquidity indicators) the instrument is classified as Level 2. If no market prices are available the fair value is measured by using valuation models which are based on observable market data. For Level 2 valuations typically yield curves, credit spreads and implied volatilities are used as observable market parameters.

Level 2 measurements include OTC derivatives, theoretically priced exchange traded derivatives, less liquid shares, bonds and funds as well as asset backed securities (ABS), collateralized debt obligations (CDO), own issues and deposits.

## LEVEL 3 OF THE FAIR VALUE HIERARCHY

If any unobservable input in the valuation model is significant or the price quote used is updated infrequently the instrument is classified as Level 3 of the fair value hierarchy. Typically credit spreads derived from internally calculated historical probability of default (PD) and loss given default (LGD) as well as effective margin are measures used as unobservable parameters. Furthermore, internally calculated cost of equity and adjustments made on the equity (in the adjusted net asset value method) are unobservable parameters for the valuation of non-trading equity instruments.

The volume of Level 3 financial assets can be allocated to the following categories:

- \_ Derivatives where the credit value adjustment (CVA) has a material impact and is calculated based on unobservable parameters (i.e. internal estimates of PDs and LGDs).
- \_ Illiquid bonds, shares, participations and funds not quoted in an active market where either valuation models with non-observable parameters have been used (e.g. credit spreads) or broker quotes have been used that cannot be allocated to Level 1 or Level 2.
- \_ Loans which do not comply with the contractual cash flow criteria.

The allocation of the appropriate level of positions is determined at the end of the reporting period.

A reclassification from Level 1 into Level 2 or Level 3 as well as vice versa will be performed if the financial instrument does no longer meet the criteria described above for the respective level.

### Classification of financial instruments carried at fair value by levels of the fair value hierarchy

Derivatives transacted via Clearing Houses are presented after netting in compliance with their balance sheet treatment. The netted derivatives are allocated to Level 2.

### VALUATION PROCESS FOR FINANCIAL INSTRUMENTS CATEGORISED AS LEVEL 3

The valuation of financial instruments categorized as Level 3 involves one or more significant inputs that are not directly observable on the market. Additional price verification steps need to be done. These may include reviewing relevant historical data and benchmarking for similar transactions, among others. This involves estimation and expert judgment. Further details regarding input parameters used and the results of the sensitivity analysis are disclosed in the sub-chapter Unobservable inputs and sensitivity analysis for Level 3 measurements below.

## CHANGES IN VOLUMES OF LEVEL 1 AND LEVEL 2 AND MOVEMENTS IN LEVEL 3

### Reclassification between Level 1 and Level 2 based on balance sheet positions and instruments

in EUR million	Dec 25		Mar 26	
	L1 to L2	L2 to L1	L1 to L2	L2 to L1
<b>Financial assets HfT</b>	<b>217</b>	<b>4</b>	<b>73</b>	<b>426</b>
Bonds	217	3	73	424

## UNOBSERVABLE INPUTS AND SENSITIVITY ANALYSIS FOR LEVEL 3 MEASUREMENTS

In case the fair value measurement of a financial asset is retrieved from input parameters which are not observable in the market, those parameters can be retrieved from a range of alternative parameters. For the preparation of the balance sheet the parameters were chosen to reflect the market situation at the reporting date.

### Range of unobservable valuation parameters used in Level 3 measurement

Financial assets / liabilities	Type of instrument	Valuation technique	Fair value in EUR million		Significant unobservable inputs	Range of unobservable inputs (weighted average)	
			Dec 25	Mar 26		Dec 25	Mar 26
Positive / negative fair value of derivatives	Forwards, swaps, options	DCF and option models with CVA adjustment based on potential future exposure	32	29	PD	0.97%-4.95% (2.22%)	0.31%-4.13% (1.04%)
					LGD	60%	60%
Financial assets at FVPL	Fixed and variable coupon bonds	DCF	22	16	Credit Spread	-1.11%-2.58% (1.97%)	-1.11%-2.03% (0.66%)
	Loans	DCF	1,524	1,727	PD	0.02%-29.18% (0.48%)	0.02%-29.18% (0.57%)
LGD					0.01%-61.63% (28.31%)	0.04%-61.63% (29.93%)	
Financial assets at FVOCI	Loans	DCF	0	889	Effective margin		Customers: 0.34%-2.74% Banks: 0.57%
					Beta levered	0.58-1.22 (0.90)	0.58-1.22 (0.90)
Financial assets at FVOCI / at FVPL	Non-trading equity instruments (participations)	Dividend Discount Model; Simplified Income Approach	281	285	Country risk premium	0.27%-2.18% (0.48%)	0.23%-2.18% (0.47%)
		Adjusted Net Asset Value	145	156	Adjusted Equity	Depending on accounting equity of investment	Depending on accounting equity of investment

The range of unobservable credit spreads for fixed and variable coupon bonds contains premiums and discounts related to riskless as well as risky, market observable (e.g. industry- and rating-specific spread curves) parameters.

For financial assets at FVOCI/at FVPL, where Beta levered and Country risk premium inputs are being used, the resulting cost of equity based on these inputs is in the range 6.02%-13.24% (2025: 6.02%-13.24%). The majority of financial assets at FVOCI/at FVPL, where Beta levered inputs are being used, is related to Financial Services (Non-bank & Insurance) with 1.04 (2025: Financial

Services (Non-bank & Insurance) with 1.03). The majority of financial assets at FVOCI/at FVPL, where Country risk premium inputs are being used, is related to Austria with 0.30% (2025: Austria with 0.32%).

In addition to the information above, equity instruments with a fair value in amount of EUR 86 million (2025: EUR 68 million) are assessed on the basis of expert opinions.

Furthermore, for equity instruments other than participations classified as Level 3, the amount of EUR 10 million (2025: EUR 10 million) is presented in the statement of financial position using the criteria of availability and quality of broker quotes.

### Sensitivity analysis - Fair value changes per product type using reasonably possible alternatives

in EUR million	Dec 25		Mar 26	
	Positive	Negative	Positive	Negative
Derivatives	1	-2	1	-1
Income statement	1	-2	1	-1
Debt securities	6	-9	28	-37
Income statement	1	-1	4	-5
Other comprehensive income	5	-7	24	-32
Equity instruments	106	-69	108	-70
Income statement	82	-54	84	-55
Other comprehensive income	24	-15	24	-15
Loans and advances	30	-98	34	-109
Income statement	30	-98	34	-109
Other comprehensive income	0	0	0	0
<b>Total</b>	<b>142</b>	<b>-177</b>	<b>170</b>	<b>-217</b>
<b>Income statement</b>	<b>113</b>	<b>-155</b>	<b>122</b>	<b>-170</b>
<b>Other comprehensive income</b>	<b>29</b>	<b>-22</b>	<b>48</b>	<b>-47</b>

In estimating these impacts, mainly changes in credit spreads (for bonds), PDs, LGDs (for CVA of derivatives) and market values of comparable equities were considered. An increase (decrease) of spreads, PDs and LGDs result in a decrease (increase) of the corresponding fair values. Positive correlation effects between PDs and LGDs were not taken into account in the sensitivity analysis. For non-trading equity instruments increases (decreases) in any of the inputs used for the cost of equity calculation in isolation would result in a lower (higher) fair value.

The following ranges of reasonably possible alternatives of the unobservable inputs were considered in the sensitivity analysis table:

- \_ for debt securities range of credit spreads between +100 basis points and -75 basis points
- \_ for equity related instruments the price range between -10% and +5%
- \_ for unquoted equity instruments measured by the adjusted net asset value the price range between -10% and +10%
- \_ for unquoted equity instruments measured by dividend discount model/simplified income approach the cost of equity range between -2% and +2%
- \_ for CVA on derivatives PDs rating upgrade/downgrade by one notch, as well as the change of LGD by -5% and +10%
- \_ for loans, the PDs rating upgrade/downgrade by 1%, the change of LGD by -5% and +10% and a range of credit spreads between +100 basis points and 75 basis points.

## Financial instruments not carried at fair value with fair value disclosed in the notes

Debt securities issued	45,604	45,723	25,944	18,632	1,147
Other financial liabilities	829	829	0	0	829
<b>Financial guarantees and commitments</b>					
Financial guarantees	n/a	36	0	0	36
Loan commitments	n/a	50	0	0	50

In the table above, positive fair values of financial guarantees and commitments are shown with a positive sign whereas negative fair values are shown with a negative sign.

The fair value of loans and advances to customers and credit institutions has been calculated by discounting future cash flows while taking into consideration interest and credit spread effects. The interest rate impact is based on the movements of market rates, while credit spread changes are derived from PDs and LGDs used for internal risk calculations. Loans and advances were grouped into homogeneous portfolios based on rating method, rating grade, maturity and the country where they were granted. The measurement of fair values of loans to customers is not affected by whether they are subject to synthetic securitisations. As a result, they are categorised as Level 3 measurements. Details on synthetic securitisations can be found in *Note 36 Use of collateral and other credit enhancements*. The fair values of debt securities at amortised cost are either taken directly from the market or they are determined by directly observable input parameters (i.e. yield curves).

The fair value of deposits and other liabilities, measured at amortised cost, is estimated by taking into account the current interest rate environment, as well as the own credit spreads. For liabilities without contractual maturities (e.g. demand deposits), the carrying amount represents the minimum of their fair value.

The fair value of issued securities and subordinated liabilities measured at amortised cost is determined based on the same valuation models as described for Liabilities above in the section Financial instruments carried at fair value.

Regarding off-balance sheet liabilities (i.e. financial guarantees and unused loan commitments) the fair value of unused loan commitments is estimated using regulatory credit conversion factors. The resulting loan equivalents are treated like other on-balance sheet assets. The difference between the calculated total fair value and the notional amount of the hypothetical loan equivalents represents the fair value of the unused loan commitments. In case of the total fair value being higher than the notional amount of the hypothetical loan equivalents the unused loan commitments have a positive fair value. The fair value of financial guarantees is estimated in analogy to credit default swaps. The fair value of the guarantee is the sum of the present value of the protection leg and the present value of the premium leg. The value of the protection leg is estimated using the PDs and LGDs of the respective customers, whereas the value of the premium leg is estimated by the present value of the future fee payments to be received. If the protection leg is higher than the premium leg, financial guarantees have a negative fair value.

### 33. Average number of employees during the financial period (weighted according to the level of employment)

	1-3 25	1-3 26
<b>Austria</b>	<b>16,832</b>	<b>16,769</b>
Erste Group Bank AG, Erste Bank Oesterreich and subsidiaries	9,345	9,230
Cross-guarantee system companies	7,487	7,539
<b>Outside Austria</b>	<b>28,977</b>	<b>38,896</b>
Erste Bank Polska Group	n/a	10,112
Česká spořitelna Group	9,638	9,582
Banca Comercială Română Group	5,130	4,997
Slovenská sporiteľňa Group	3,546	3,488
Erste Bank Hungary Group	3,404	3,442
Erste Bank Croatia Group	3,206	3,072
Erste Bank Serbia Group	1,268	1,283
Savings banks subsidiaries	1,555	1,597
Other subsidiaries and foreign branch offices	1,228	1,323
<b>Total</b>	<b>45,809</b>	<b>55,665</b>

For better comparability, prior-year figures have been adjusted to align with the current presentation format. The line item ‘Savings banks’ has been replaced by ‘Cross-guarantee system companies’, resulting in a reallocation from the line ‘Erste Group, EB Oesterreich and subsidiaries’ to ‘Cross-guarantee system companies’.

### 34. Own funds and capital requirements

#### Regulatory requirements

Since 1 January 2014, Erste Group has been calculating the regulatory own funds and the regulatory capital requirements according to the Capital Requirements Regulation (CRR, Regulation (EU) No. 575/2013)<sup>1</sup> and the Capital Requirement Directive (CRD IV, Directive (EU) 2013/36/EU). Both the CRD IV and CRD V<sup>2</sup> were transposed into national law in the Austrian Banking Act (ABA).

All requirements as defined in the CRR, the ABA and in technical standards issued by the European Banking Authority (EBA) are applied by Erste Group for regulatory purposes.

Furthermore Erste Group also fulfils capital requirements determined in the Supervisory Review and Evaluation Process (SREP).

#### Accounting principles

The financial and regulatory figures published by Erste Group are based on IFRS. Eligible capital components are derived from the balance sheet and income statement which were prepared in accordance with IFRS.

<sup>1</sup> Both CRD IV and CRR have been amended since the entry into force in 2014 inter alia with directive (EU) 2019/878 (CRD V), directive (EU) 2024/1619 (CRD VI; implementation is still in political coordination), as well as regulations (EU) 2019/876 (CRR 2), (EU) 2020/873 (CRR Quick Fix) and regulation (EU) 2024/1623 (CRR3) which came into force on January 1 2025 and includes phased implementation deadlines, e.g., concerning the output floor.”

<sup>2</sup> CRD V has been transposed by an amendment of the ABA (BGBl I 2021/98; BWG-Novelle) which entered into force on 31 May 2021.

## Regulatory scope of consolidation and institutional protection scheme

The consolidated regulatory own funds and the consolidated regulatory capital requirements are calculated based on the scope of consolidation stipulated in the CRR. The definition pursuant to CRR differs from the scope of consolidation according to IFRS, which also includes insurance companies and other entities, that are subject to full consolidation.

Erste Group Bank AG is a member of the Haftungsverbund (cross-guarantee system) of the Austrian savings bank sector. As of the balance sheet date Erste Group Bank AG and Erste Bank der oesterreichischen Sparkassen AG as well as Bausparkasse der österreichischen Sparkassen AG and all Austrian savings banks form this cross-guarantee system. Based on the cross-guarantee contract these entities are included as subsidiaries in Erste Group's regulatory scope of consolidation.

Furthermore, Erste Group Bank AG together with the Haftungsverbund entities form an institutional protection scheme (IPS) according to Art. 113 para 7 CRR. Disclosure requirements for the institutional protection scheme according to Art. 113 para 7 e CRR are met by the publication of the consolidated financial statements, which cover all entities included in the institutional protection scheme.

## Consolidated own funds

Own funds according to CRR consist of Common Equity Tier 1 (CET1), Additional Tier 1 (AT1) and Tier 2 (T2). In order to determine the capital ratios, each respective capital component – after application of all regulatory deductions and filters – is considered in relation to the total risk amount.

Beside the regulatory minimum capital ratios also capital buffers according to ABA and regulations of the Financial Market Authority (FMA) need to be considered.

In addition to minimum capital ratios and capital buffer requirements, institutions also have to fulfil capital requirements determined in the Supervisory Review and Evaluation Process (SREP). As a result of the 2025 SREP process performed by the European Central Bank (ECB) Erste Group applies a Pillar 2 requirement (P2R) of 2.00% as of 31 March 2026.

Following the SREP 2025, Erste Group is expected to meet a Pillar 2 Guidance (P2G) of 1.0% with CET1, valid as of 1 January 2026 onwards.

## Overview of capital requirements and capital buffers

	Dec 25	Mar 26
<b>Pillar 1</b>		
Minimum CET1 requirement	4.50%	4.50%
Minimum Tier 1 requirement	6.00%	6.00%
Minimum own funds requirement	8.00%	8.00%
<b>Combined buffer requirement (CBR)</b>	<b>6.03%</b>	<b>6.07%</b>
Capital conservation buffer	2.50%	2.50%
Countercyclical capital buffer	0.70%	0.75%
Systemic risk buffer	1.08%	1.07%
O-SII capital buffer	1.75%	1.75%
Minimum CET1 requirement (incl. CBR)	10.53%	10.57%
Minimum Tier 1 requirement (incl. CBR)	12.03%	12.07%
Minimum own funds requirement (incl. CBR)	14.03%	14.07%
<b>Pillar 2</b>	<b>2.00%</b>	<b>2.00%</b>
Minimum CET1 requirement	1.13%	1.13%
Minimum T1 requirement	1.50%	1.50%
Minimum own funds requirement	2.00%	2.00%
<b>Total CET1 requirement for Pillar 1 and Pillar 2</b>	<b>11.65%</b>	<b>11.69%</b>
<b>Total Tier 1 requirement for Pillar 1 and Pillar 2</b>	<b>13.53%</b>	<b>13.57%</b>
<b>Total capital requirement for Pillar 1 and Pillar 2</b>	<b>16.03%</b>	<b>16.07%</b>

## Capital structure (phased in)

in EUR million	Dec 25	Mar 26
<b>Common equity tier 1 capital (CET1)</b>		
Capital instruments eligible as CET1	2,337	2,337
Retained earnings	20,118	20,099
Accumulated other comprehensive income (and other reserves)	-404	-803
Minority interest recognised in CET1	8,092	9,980
<b>Common equity tier 1 capital (CET1) before regulatory adjustments</b>	<b>30,143</b>	<b>31,613</b>
Own CET1 instruments	-125	-118
Prudential filter: cash flow hedge reserve	12	200
Prudential filter: Cumulative gains and losses due to changes in own credit risk on fair valued liabilities	114	89
Prudential filter: Fair value gains and losses arising from the institution's own credit risk related to derivative liabilities	-10	-13
Value adjustments due to the requirements for prudent valuation	-97	-132
Securitisation which qualify for a RW of 1250%, where the institution opts for the deduction alternative (deduction from CET1)	-175	-182
Goodwill	-621	-2,809
Other intangible assets	-434	-1,595
DTA that rely on future profitability and do not arise from temporary differences net of associated tax liabilities	-1	-1
CET1 capital elements or deductions – other	-282	-562
<b>Common equity tier 1 capital (CET1)</b>	<b>28,524</b>	<b>26,491</b>
<b>Additional tier 1 capital (AT1)</b>		
Capital instruments eligible as AT1	3,479	3,479
Instruments issued by subsidiaries that are given recognition in AT1	11	11
Other AT1 eligible elements	0	247
<b>Additional tier 1 capital (AT1) before regulatory adjustments</b>	<b>3,490</b>	<b>3,737</b>
Own AT1 instruments	-1	-5
<b>Additional tier 1 capital (AT1)</b>	<b>3,489</b>	<b>3,732</b>
<b>Tier 1 capital = CET1 + AT1</b>	<b>32,013</b>	<b>30,223</b>
<b>Tier 2 capital (T2)</b>		
Capital instruments eligible as T2	4,100	4,728
Instruments issued by subsidiaries recognised in T2	360	361
IRB excess of provisions over expected losses eligible	127	127
Other T2 eligible elements	0	364
<b>Tier 2 capital (T2) before regulatory adjustments</b>	<b>4,587</b>	<b>5,579</b>
Own T2 instruments	-61	-45
<b>Tier 2 capital (T2)</b>	<b>4,526</b>	<b>5,534</b>
<b>Total own funds</b>	<b>36,539</b>	<b>35,757</b>
<b>Capital requirement</b>	<b>11,799</b>	<b>14,657</b>
<b>CET1 capital ratio</b>	<b>19.3%</b>	<b>14.5%</b>
<b>Tier 1 capital ratio</b>	<b>21.7%</b>	<b>16.5%</b>
<b>Total capital ratio</b>	<b>24.8%</b>	<b>19.5%</b>

The position 'CET1 capital elements or deduction – other' includes the development of unaudited risk provisions during the year (EU No 183/2014) and insufficient coverage for non-performing exposures (NPE Backstop) covering the requirements from both Art. 36 para 1 (m) CRR in connection with Art. 47(c) CRR and the Addendum to the ECB Guidance to banks on non-performing loans: supervisory expectations for prudential provisioning of non-performing exposures. Furthermore this position contains exposures to CIU (Collective Investment Undertakings) with a risk weight of 1,250%.

The positions 'Other AT1 eligible elements' and 'Other T2 eligible elements' include minority interest which exceed the CET1 eligibility.

## Risk structure (phased in)

in EUR million	Dec 25		Mar 26	
	Total risk	Capital requirement	Total risk	Capital requirement
<b>Total risk exposure amount</b>	<b>147,487</b>	<b>11,799</b>	<b>183,210</b>	<b>14,657</b>
Risk weighted assets (credit risk)	119,889	9,591	149,130	11,930
Standardised approach	25,418	2,033	51,868	4,149
IRB approach	91,091	7,287	93,464	7,477
Contribution to the default fund of a CCP	10	1	11	1
Securitizations	3,370	270	3,786	303
Settlement risk	1	0	6	0
Trading book, foreign FX risk and commodity risk	4,585	367	5,358	429
Operational risk	22,277	1,782	27,451	2,196
Exposure for CVA	333	27	756	60
Other exposure amounts (incl. Basel 1 floor)	402	32	508	41

The position “Other exposure amounts (including Basel 1 floor)” includes an additional RWA add-on in the amount of approximate EUR 402 million due to a temporary non-compliance with the CRR3 provisions related to the CCF estimates and a temporary RWA add-on of roughly EUR 106 million due to the dividend risk under the risks-not-in-the-model (RNIME) framework for market risk.

## 35. Events after the balance sheet date

There are no significant events after the balance sheet date.

## 36. Agreement on the acquisition of Erste Bank Polska

In May 2025, Erste Group Bank AG and Banco Santander S.A. entered into an agreement under which Erste Group acquired a 49% stake in Santander Bank Polska Group S.A., a publicly listed universal bank operating in Poland, and a 50% stake in Santander Towarzystwo Funduszy Inwestycyjnych S.A. (“TFI”), an asset management company. The transaction was closed on 9 January 2026, the acquisition date, when Erste Group obtained control of the companies.

At the extraordinary general assembly of Santander Bank Polska S.A. held on 22 January 2026, a resolution to rename Santander Bank Polska S.A. to ‘Erste Bank Polska S.A.’ was unanimously approved. The rebranding will also apply to other Santander Bank Polska group companies that have ‘Santander’ in their name. As a result, Santander Bank Polska S.A. is further referred to as ‘Erste Bank Polska’ which also applies when the disclosures relate to the period before the acquisition date.

The acquisition of Erste Bank Polska is consistent with Erste Group’s strategic objective of strengthening its presence in Central and Eastern Europe and expanding its retail and corporate banking operations in Poland, one of the largest and fastest-growing banking markets in the EU. The business combination provides Erste Group with access to a well-diversified customer base, a strong distribution network and a scalable operational platform. Erste Bank Polska is the third-largest bank in Poland by assets, with a market share of 8% (based on the transaction perimeter as of December 2024), and is also one of the most profitable banks in the country. It offers a full range of commercial banking products to retail, SME and corporate clients. TFI is an asset management company with EUR 6 billion in assets under management as of December 2024.

Erste Group considers that the 49.00% stake in Erste Bank Polska constitutes a controlling interest, despite not representing a majority of the voting rights. Currently Banco Santander S.A. holds 9.70%, Allianz Polska Otwarty Fundusz Emerytalny 5.23% and Nationale-Nederlanden OFE 5.01% of the share capital in Erste Bank Polska. The remaining 31.06% of the share capital is in free float, of which 12.36% is held by 21 institutional investors each holding more than a 0.1% stake. There is no information regarding voting agreements among the shareholders. Over the last five years the participation rate at general meetings of Erste Bank Polska was stable between 82% to 86%. The critical participation rate at which shareholders, acting in a mutual agreement, could theoretically outvote Erste Group exceeds 98%. As a result, Erste Group concludes that due to the wide dispersion of shareholdings of the other vote holders it exercises control over Erste Bank Polska.

Regarding TFI, the other 50% stake is held directly by Santander Bank Polska which grants Erste Group control over 100% of the voting rights.

The transaction is accounted for as a business combination using the acquisition method under IFRS 3.

**Consideration transferred.** The consideration amounts to EUR 7,035 million paid in cash. No equity-settled consideration arrangements exist. The amount consists of EUR 6,844 million paid for Erste Bank Polska and EUR 171 million paid for TFI. The remaining EUR 20 million relates to post-tax effect of the acquisition price increase in connection with the sale of shares in Santander Consumer Bank S.A. (subsidiary of Erste Bank Polska S.A) held by Erste Bank Polska prior to the finalisation of the transaction. The consideration of EUR 20 million was paid in cash in March 2026 in accordance with the contract, while the remaining consideration of EUR 7,015 million was paid on the acquisition date.

**Acquisition related costs.** The Group incurred acquisition-related costs of EUR 38 million relating to external legal fees, advisory and due diligence costs. These costs were recognised in 2025 and included in 'administrative expenses' in the consolidated statement of income.

**Identifiable assets acquired and liabilities assumed.** The following table summarises the recognised amounts of assets acquired and liabilities assumed at the date of acquisition measured based on the IFRS 3 requirements.

in EUR million	Carrying Amount	IFRS 3 adjustment	IFRS 3 measurement
Cash and cash balances	3,240	0	3,240
Financial assets held for trading	4,105	0	4,105
Financial assets at fair value through other comprehensive income	9,198	0	9,198
Debt securities at amortised cost	11,880	277	12,158
Loans and advances to banks at amortised cost	3,387	0	3,387
Loans and advances to customer at amortised cost	33,903	266	34,169
Finance lease receivables	2,546	15	2,560
Hedge accounting derivatives	479	0	479
Property and equipment	309	0	309
Intangible assets	633	-369	264
Customer relationship	0	2,170	2,170
Investments in associates and joint ventures	234	97	332
Deferred tax assets	158	-158	0
Other assets	2,834	3	2,837
<b>Total assets</b>	<b>72,906</b>	<b>2,301</b>	<b>75,206</b>
Financial liabilities held for trading	2,925	0	2,925
Deposits from banks at amortised cost	675	0	675
Deposits from customers at amortised cost	55,059	0	55,059
Debt securities issued at amortised cost	3,813	0	3,813
Lease liabilities	92	0	92
Hedge accounting derivatives	46	0	46
Provisions	579	331	909
Deferred tax liability	0	481	481
Other liabilities	1,317	103	1,420
<b>Total liabilities</b>	<b>64,505</b>	<b>915</b>	<b>65,420</b>

Although the legal closing of the transaction took place on 9 January 2026, the opening balances as of 1 January 2026 (identical to the closing balances as of 31 December 2025) were used as the carrying amounts of the identifiable assets acquired and liabilities assumed. They were adjusted for significant transactions and other relevant events arising in the intervening period.

In accordance with IFRS 3, the assets acquired and the liabilities assumed as part of the purchase price allocation at the acquisition date are generally measured at fair value. In accordance with IFRS 13, for assets and liabilities for which quoted prices in active markets are not available, fair values are determined using valuation techniques that require the use of assumptions and judgments. Absence of quoted market prices is common in the purchase price allocation process. Accordingly, the fair values recognised in the PPA are subject to estimation uncertainty and reflect reasonable estimates based on information available at the acquisition date, rather than precise or directly observable amounts.

## The acquired receivables

### Loans and advances to banks at AC

in EUR million	Amount
Fair value of the receivables	3,387
Gross contractual amounts receivable	3,387
Contractual cash flows not expected to be collected	0

## Loans and advances to customers at AC

in EUR million	Amount
Fair value of the receivables	34,169
Gross contractual amounts receivable	35,143
Contractual cash flows not expected to be collected	1,463

## Loans and advances to customers at FVOCI

in EUR million	Amount
Fair value of the receivables	881
Gross contractual amounts receivable	914
Contractual cash flows not expected to be collected	36

## Finance lease receivables

in EUR million	Amount
Fair value of the receivables	2,560
Gross contractual amounts receivable	2,562
Contractual cash flows not expected to be collected	53

## Factoring receivables (Other assets)

in EUR million	Amount
Fair value of the receivables	1,977
Gross contractual amounts receivable	2,007
Contractual cash flows not expected to be collected	34

## Goodwill

Goodwill arising from the acquisition was measured as follows.

in EUR million	Amount
(i) Consideration transferred*	7,035
(ii) Non-controlling interests measured based on a proportionate share in the recognised amounts of the assets and liabilities of Erste Bank Polska	4,971
(iii) Fair value of identifiable net assets**	9,786
Goodwill = (i) + (ii) – (iii)	2,220

\* See part Consideration transferred

\*\* See part Identifiable assets acquired and liabilities assumed

The goodwill recognised in connection with the acquisition primarily reflects:

- anticipated synergies expected to arise from integrating the operations of Erste Bank Polska with those of Erste Group, including operational efficiencies, enhanced distribution capabilities, optimisation of funding and liquidity management, and cost rationalisation;
- the value of assembled workforce and other intangible resources that do not meet the recognition criteria for identifiable intangible assets under IAS 38;
- expected future profitability of the combined entity that cannot be separately recognised as an intangible asset; and
- the strategic benefits derived from expanding Erste Group's footprint in a key EU banking market not otherwise available for separate recognition.

Goodwill is not expected to be tax deductible.

## Contribution to the operating income and the net result

Due to immateriality of the differences resulting from the short period between 1 January 2026 and the acquisition date on 9 January 2026, Erste Bank Polska was included in the consolidated financial statements of Erste Group as of 1 January 2026. Up to the reporting date of 31 March 2026, the contribution of the Erste Bank Polska group to Erste Group's operating income amounts to EUR 889 million, while the contribution to the net result for the period amounted to EUR 29 million.

The purchase price allocation has been finalised for all the assets acquired and liabilities assumed except for the area of provisions, due to the ongoing assessment of recent court rulings. For this reason, the measurement period for this topic remains open in accordance with IFRS 3.45 until more information about facts and circumstances that existed as of the acquisition date in relation to these matters has been obtained.

# Your notes

We have prepared this report with the greatest possible care and have thoroughly checked the data presented in it. However, we cannot rule out errors associated with rounding, transmission, typesetting or printing. The English version of the report is a translation.

#### **NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This report contains forward-looking statements. These statements are based on current estimates, assumptions and projections of Erste Group Bank AG and currently available public information. They are not guarantees of future performance and involve certain known and yet unknown risks and uncertainties and are based upon assumptions as to future events that may not prove to be accurate. Many factors could cause the actual results or performance to be materially different from those that may be expressed or implied by such statements. Erste Group Bank AG does not assume any obligation to update the forward-looking statements contained in this report.
