1. ENTITY THAT REPORTS

Mecanica Ceahlău SA is a company headquartered in Romania. The company has its registered office in Piatra Neamț, strada Dumbravei, nr. 6, Neamț county, Romania.

The individual financial statements of the Company were drafted according to the International Financial Reporting Standards ("IFRS") in force on the date of the reporting of the Company, respectively 31 March 2018 and according to the provisions of the Order of the Ministry of Public Finances no. 2844/2016, for the approval of the Accounting Regulations according to the International Financial Reporting Standards, applicable to the commercial companies whose securities are admitted to trading on a regulated market, as further amended and supplemented. These provisions are according to the requirements of the International Financial Reporting Standards, adopted by the European Union.

The main activity of the company is the manufacture of the machineries and equipment for agriculture and logging,

2. BASIS OF DRAFTING

a. Declaration of Conformity

The individual financial statements were drafted according to:

- International Financial Reporting Standards (IFRS), adopted by the European Union;
- Accounting Law 82 from 1991, republished and updated;
- Order of the Ministry of Public Finances no. 2844/2016 for the approval of the Accounting Regulations according to the International Financing Reporting Standards, applicable to companies whose securities are admitted to trading on a regulated market.

The individual financial statements were authorized for issuance by the Board of Directors on 23,03,2018,

b. Basis of the assessment

The individual financial statements were drafted according to the historical cost, excepting building that are held at the reassessed value and of real estate investments that are held at fair value.

These individual financial statements were drafted for general purposes, for the use of persons that know the provisions of the International Financing Reporting Standards, applicable to companies whose securities are admitted to trading on a regulated market, approved by the Order of the Ministry of Public Finances 2844/2016.

In consequence, these individual financial statements shall not be considered as the unique source of information by a potential investor or by another user,

c. Functional and presentation currency

These individual financial statements are presented in RON, this being the functional currency of the Company as well. All financial information is presented in RON, rounded, without decimals. Transactions in foreign currencies are expressed in RON, applying the exchange rate at the date of transaction. Assets and monetary debts expressed in foreign currency at the end of the period are expressed in RON at the exchange rate of that date. Gains and losses from differences of the exchange rate, achieved or not achieved, are registered in the Individual Statement of the global result of that respective period.

BASIS OF DRAFTING (cont.)

c. Functional and presentation currency (cont.)

Exchange rates on 31 March 2018 and 1 January 2018 are as follows:

	31 March 2018	1 January 2018
EUR	4,6576	4,6597
USD	3,7779	3,8915

Non-monetary assets and debts are expressed in the foreign currency that are assessed at fair value are converted in the functional currency at the exchange rate of the date in which the fair value was determined. The non-monetary elements that are assessed at historical cost in a foreign currency are converted using the exchange rate of the date in which the transaction was made.

d. Use of estimations and professional reasoning

Drafting of the individual financial statements according to the Order no. 2844/2016, as further amended, proposes the use by the management of certain professional reasonings, estimations and hypotheses that affect the application of the accounting policies and the reported value of the assets, debts, incomes and expenses. The effective results may differ from the estimated values.

Estimations and hypotheses that are the base of these are periodically reviewed. The reviews of the accounting estimations are recognized in the period in which the estimation was reviewed and in the future affected periods.

Information on the uncertainties due to hypotheses and estimations that involve a significant risk regarding the need of certain adjustments in the current and previous financial year are included in the following notes:

- Note 8 - Expenses with salaries and social contributions;
- Note 11 - Receivables and debts regarding deferred tax;
- Note 22 - Provisions;
- Note 23 - Commercial debts and other debts;
- Note 25 - Commitments and contingents

The estimations and assumptions associated to these estimations are based on the historical experience, as well as other factors considered reasonable in the context of these estimations. The results of these estimations and hypotheses form the base of judgments regarding the accounting values of assets and debts that may not be obtained from other sources of information.

Estimations and critical judgments that the management made during the process of applying the accounting policies and which have a significant impact upon the values recognized in the financial statements are presented next.

Not taken leaves

The management estimates at the end of each reporting period the value of not taken leaves by the employees of the Company,

Receivables and debts relating to the deferred tax

Assets and debts of deferred tax are determined based on the temporary differences between the accounting value of the assets and debts from the financial statements and their fiscal value. Recognition of assets on deferred tax shall be made to the extent in which it is probable that a taxable benefit, upon which these deductible temporary differences could be imputed, is available,

Receivables and invoices to be drafted

The management estimates at the end of each reporting period the probability of collection of receivables and constitutes value adjustments for the part considered unrecoverable. Adjustments are made based on the specific analysis of the invoices in balance,

Also, the management estimates the value of the invoices that are to be drafted based on the existent contracts.

2. BASIS OF DRAFTING (cont.)

d. Use of estimations and professional reasoning (cont.)

Provisions and contingent debts

The management makes estimations and uses professional reasonings in the process of measurement and recognition of provisions, when determining the exposure to contingent debts resulted from disputes in which the Company is involved or from other disputes that are the object of negotiation, arbitration or regulation. The professional reasoning is used to determine the probability that a certain dispute will be lost and a debt will appear and to quantify the value of this debt, Following the uncertainty involved in this assessment process, the actual debts may differ from the provisions initially estimated.

Lifetime of the tangible assets

The management reviews the adequacy of the useful lifetime of the tangible assets at the end of each reporting period,

Invoices to be received

The value of the invoices to be received is estimated by the management based on the contracts concluded with the suppliers and by the comparative analysis of these with the previous periods.

Deferred tax

Assets and debts of deferred tax are determined based on the temporary differences between the accounting value of the assets and debts from the financial statements and their fiscal value. Recognition of assets on deferred tax shall be made to the extent in which it is probable that a taxable benefit, upon which these deductible temporary differences could be imputed, is available,

Provisions and contingent debts

The management makes estimations and uses professional reasonings in the process of measurement and recognition of provisions, when determining the exposure to contingent debts resulted from disputes in which the Company is involved or from other disputes that are the object of negotiation, arbitration or regulation. The professional reasoning is used to determine the probability that a certain dispute will be lost and a debt will appear and to quantify the value of this debt. Following the uncertainty involved in this assessment process, the actual debts may differ from the provisions initially estimated.

Estimations and critical judgments that the management made during the process of applying the accounting policies and which have a significant impact upon the values recognized in the financial statements are presented next.

Estimations and hypotheses that are the base of these are periodically reviewed. The reviews of the accounting estimations are recognized in the period in which the estimations are reviewed, if the review affects only that period, as well as in the future affected periods.

e. Applicable accounting policies

Standards and interpretations in force in the current period

The following amendments of the existing standards and new interpretations issued by the International Accounting Standards Board (IASB) and adopted by the EU are valid for the current reporting period:

- **Amendments to IFRS 10 "Consolidated financial statements", IFRS 12 "Presentation of information on the interests in other entities" and IAS 28 "Investments in affiliated entities and joint ventures"** – Investment companies: application of consolidation exception (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments la IFRS 11 "Joint Ventures"** –bookkeeping method of interests in jointly controlled entities "Joint Ventures" – adopted by EU on November 24, 2015 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments to IAS 1 "Presentation of Financial Statements"** – initiative regarding the presentation requirements – adopted by EU on 18th of December 2015 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments to IAS 16 "Tangible assets" and IAS 38 "Intangible assets"** – Clarification regarding the acceptable amortization methods – adopted by EU on 2nd of December 2015 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments to IAS 16 "Tangible assets" and IAS 41 "Agriculture"** – Reproduction plants – adopted by EU on November 23, 2015 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments to IAS 19 "Employee Benefits"** – plans of defined benefits: contributions of employees, adopted by EU on 17th of December 2014 (applicable for the yearly periods of time starting on or after February 1, 2015);
- **Amendments to IAS 27 "Individual financial statements"** – equity method within the individual financial statements – adopted by EU on December 18, 2015 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments of different standards "IFRS Improvements (2011-2013 cycle)"** resulting from the yearly project for IFRS improvement (IFRS 2, IFRS 3, IFRS 8, IFRS 13, IAS 16, IAS 24 and IAS 38) with the main purpose of eliminating the inconsistencies and clarifying some formulations – adopted by EU on 18th of December 2014 (applicable for the yearly periods of time starting on or after January 1, 2016);
- **Amendments to various standards "IFRS Improvements (2012-2014 cycle)"** resulting from the yearly project for IFRS improvement (IFRS 5, IFRS 7, IAS 19 and IAS 34) with the main purpose of eliminating the inconsistencies and clarifying some formulations – adopted by EU on 15th of December 2015 (applicable for the yearly periods of time starting on or after January 1, 2016),

2. BASIS OF DRAFTING (cont.)

e. Applicable accounting policies (cont.)

The adoption of these completions to the existing standards did not change the accountancy policies of the Company.

Standards and amendments to existent standards issued by IASB, which are not yet in force

Standards and interpretations issued by IASB, adopted by EU, which are not yet in force

At the date of reporting of these financial statements, the following standards and amendments to the standards issued by IASB and adopted by EU are not yet in force:

- **IFRS 9 "Financial Instruments"** – adopted by the EU on November 22, 2016 (applicable for annual periods of time starting on or after January 1, 2018).
- **IFRS 15 "Income from contracts concluded with customers"**, as further amended, and amendments to IFRS 15 "Effective date of IFRS 15" – adopted by the EU on September 22, 2016 (applicable for annual periods of time starting on or after January 1, 2018)

The company has chosen not to adopt these new standards and amendments to the existent standards before the effective dates of entering into force. The company anticipates that the adoption of these standards and amendments to the existent standards will not have a significant impact upon the financial statements of the Company in the initial application period.

2. BASIS OF DRAFTING (cont.)

e. Applicable accounting policies (cont.)

Standarde si interpretări emise de IASB dar care nu au fost încă adoptate de UE

Standards and interpretations issued by IASB, but not yet adopted by EU

Currently, IFRS as adopted by EU do not significantly differ by the regulations adopted by IASB, excepting the following standards, amendments and interpretations, whose applications was not yet approved by EU until the date of publishing these financial statements (date of entry into force mentioned below are for all IFRS standards):

- **IFRS 14 "Deferring account for regulated entities"** (applicable for the yearly periods of time starting on or after January 1, 2016) – the European Commission decided not to initiate the process of adopting this interim standard, but to wait for the issuance of the final standard;
- **IFRS 16 „Leasing”** (applicable for the yearly periods of time starting on or after January 1, 2019);
- **Amendments to IFRS 2 "Payment based on shares"** – Classification and assessment of transactions based on shares (applicable for annual periods starting on or after January 1, 2018), adoption is still on hold for the second half of 2017.
- **Amendments to IFRS 4 "Insurance contracts"** – The application of IFRS 9 Financial Instruments with IFRS 4 Insurance contracts (applicable for annual periods starting on or after January 1, 2018 or when IFRS 9 – "Financial instruments" is applied for the first time), adoption is still waited in 2019.
- **Amendments to IFRS 10 "Consolidated financial statements" and IAS 28 "Investments in affiliated entities and joint ventures"**- Sale of or contribution with assets between an investor and affiliated entities or its joint ventures and the subsequent amendments (the date of entering into force was postponed for an indefinite period of time, until completing the research project regarding the equity method).
- **IFRS 15 "Income from contracts concluded with customers"** – Clarifications of IFRS 15 Income from contracts concluded with customers (applicable for annual periods starting on or after January 1, 2018).
- **Amendments to IAS 7 "Cash flow statement"** – initiative on presentation requirements (applicable for annual periods starting on or after 1 January 2018).
- **Amendments to IAS 12 "Profit tax"** – recognition of receivables on deferred tax from unachieved losses (applicable for annual periods starting on or after 1 January 2018).
- **Amendments to IAS 40 "Real estate investments"** – transfer of real estate investments (applicable for annual periods starting on or after January 1, 2018).

2. BASIS OF DRAFTING (cont.)

e. Applicable accounting policies (cont.)

- **Amendments to various standards "Improvements of IFRS (cycle 2014-2016)",** which result from the annual improvement of IFRS project (IFRS 1, IFRS 12 and IAS 28), with the main purpose of eliminating inconsistencies and of clarifying certain formulations (amendments to IFRS 12 are applicable for annual periods starting on or after January 1, 2018, and amendments to IFRS 1 and IAS 18 are applicable for annual periods starting on or after January 1, 2018).
- **IFRIC 22 "Trading in foreign currency and advances"** (applicable for annual periods starting on or after January 1, 2018).

The company anticipates that the adoption of these standards and amendments to the existent standards will not have a significant impact upon the financial statements of the Company in the initial application period.

The coverage accounting against risks for a portfolio of financial assets and liabilities whose principles were not adopted by the EU remains unregulated. According to the estimations of the Company, the use of the coverage accounting against risks of a portfolio of financial assets and liabilities according to IAS 29: "Financial instruments: recognition and assessment" shall not affect significantly the financial statements, if it is applied on the date of the balance sheet.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies presented below have been consistently applied for all the periods presented in these individual financial statements by the Company,

a. Foreign currency

(i) Transactions in foreign currency

Transactions of the Company in foreign currency are registered at the exchange rate communicated by the National Bank of Romania (NBR) for the date of transactions. Balances in foreign currency are converted in RON at the exchange rates communicated by NBR on 31 March 2018.

Gains and losses arising from the settlement of transactions in a foreign currency and from the translation of monetary assets and liabilities denominated in foreign currency are recognized in the individual income statement as part of the financial result.

b. Financial Instruments

(i) Non-derivative financial instruments

The Company's financial instruments are initially recognized at the date of the transaction, when the Company becomes part of the contractual terms of the instrument.

The Company derecognizes a financial asset when the contractual rights to asset-generated cash flows expire or when the rights to receive the contractual cash flows of the financial asset are transferred, through a transaction where the risks and rewards of ownership of the financial asset are transferred significantly.

The Company classifies its non-derivative financial assets as follows: receivables, cash and cash equivalents. Receivables include trade receivables and other receivables,

CLIENTS AND ASSIMILATED ACCOUNTS

Clients and assimilated accounts include invoices issued at nominal value and estimated receivables related to services rendered, but invoiced in the period after the end of the period. Clients and assimilated accounts are recorded at amortized cost less impairment losses. The amortized cost of clients and assimilated accounts approximates the nominal value. Final losses may vary from current estimates. Due to the inherent lack of information regarding the financial position of the clients and the lack of legal collection mechanisms, estimates of probable losses are uncertain. However, the management of the Company has made the best estimate of the loss and considers that this estimate is reasonable in the given circumstances. In the estimation of losses, the Company also took into account the previous experience for a collective estimate, as presented in Note 3.i.(i). Trade receivables are recorded at the invoiced amount less adjustments for impairment of these receivables (see Note 3.i.(i)).

The nominal amount of receivables with collection in installments over one year is updated considering the best estimate of an interest rate, to take into account the time value of the money,

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash balances and spot and forward bank deposits (with a maturity of 3 months or more than 3 months).

(i) Financial assets at fair value through the profit and loss account

Financial assets are classified under the Company's business model for the management of the financial assets and the contractual cash flow characteristics of the financial asset.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Financial assets are classified in this category if they are acquired for the purpose of selling and/or reacquisition in the short term. This category includes investments in managed funds. These assets are mainly purchased to generate profit from short-term price fluctuations.

Financial assets at fair value through the profit and loss account are recorded in the statement of financial position at fair value.

A gain or loss on these instruments is recognized directly in the profit and loss account.

(Ii) Non-derivative financial debts

The Company initially recognizes debt instruments issued and the subordinated debt at the date of the transaction, when the Company becomes part of the contractual debt terms,

An entity has to derecognize a financial liability (or part of a financial liability) in the Individual Statement of financial position when and only when it is liquidated - that is, when the liability specified in the contract is extinguished or canceled or expires.

These financial debts are initially recognized at fair value plus any directly attributable trading costs. Subsequent to initial recognition, these financial debts are measured at amortized cost,

Debts to suppliers and other debts, initially recorded at fair value and subsequently measured using the effective interest method, include the equivalent value of the invoices issued by the suppliers of products, works executed and services rendered,

(iii) Share capital

Ordinary shares are classified as part of equity. The Company recognizes the changes in the share capital in the conditions stipulated by the legislation in force and only after their approval by the General Meeting of Shareholders and registration with the Trade Register. Additional costs attributable directly to the issue of shares are recognized as a deduction from equity, net of tax effects.

c. Dividends

Dividends are recognized as a liability in the period in which their distribution is approved,

d. Tangible assets

(i) Recognition and assessment

The tangible assets are initially entered at the acquisition or production cost (if achieved from labor operations).

The cost of a tangible asset element is the equivalent in cash of the price on the date of the recognition.

Elements included in tangible assets are assessed as such:

- At reassessed value, this being the fair value on the date of reassessment, minus any amortization and any loss from impairment cumulated for the class of assets from the group of building and special constructions;
- At cost, minus amortization and adjustments cumulated from impairment for the other groups of assets.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

d. Tangible assets (continuation)

In the case of revaluation, the difference between fair value and historical cost value is presented in the revaluation reserve. If the result of a revaluation is an increase from net book value, then it is treated as follows:

- as an increase in the revaluation reserve if there was no prior decrease recognized as an expense related to that asset; or
- as an income to offset the expense previously recognized for that asset.

If the result of a revaluation is a decrease from net book value, then it is treated as follows:

- as an expense with the full amount of the impairment, when in the revaluation reserve no amount is recorded regarding that asset (revaluation surplus); or
- as a decrease in the revaluation reserve with the minimum of the value of that reserve and the value of the decrease, and any remaining uncovered difference is recorded as an expense,

(ii) Reclassification in real estate investments

The Company reclassifies property, plant and equipment as real estate investment if and only if there is a change in use, evidenced by:

- (a) the beginning of the use by the owner for a transfer in the category of real estate investments in the category of real estate used by the owner;
- (b) starting the improvement process in the prospect of sale, for a transfer in the category of real estate investments in the stock category;
- (c) the end of use by the owner for a transfer from the category of real estate used by the owner in the category of real estate investments;
- (d) the start of an operating lease with another party, for a transfer from the stock category to the real estate investment category,

(iii) Subsequent costs

Subsequent expenditure on maintenance and repair of fixed assets made to restore or maintain the value of these assets are recognized in the statement of comprehensive income on the date when it was made, while the expenditure incurred in order to improve the technical performances are capitalized and amortized over the remaining period of amortization of that fixed asset. Parts of certain elements of tangible assets may require replacement at regular intervals. An entity recognizes in the carrying amount of an item of property the cost of replacing a spare part of such an item when that cost occurs, if the recognition criteria are met.

When the Company recognizes in the carrying amount of a tangible asset the cost of a partial replacement (replacement of a component), the carrying amount of the replaced part with the related amortization is removed from the accounting,

(iv) Amortization of tangible assets

Amortization is calculated to decrease the cost, less the residual value, using the linear amortization method over the life of the fixed assets and their components, which are separately accounted for.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

d. Tangible assets (continuation)

The estimated lifetimes of the main groups of property, plant and equipment are as follows:

Asset	Years
Constructions	10 - 50
Technical installations and machinery	2 - 28
Other installations, vehicles, machinery and furniture	5 - 15

Property under construction is not amortized,

Land is not amortized. The land presented in the financial statements has been revalued by the Company in accordance with legal regulations. The information is presented in Note 12 (i) (revaluation). If the carrying amount of an asset is greater than the amount to be recovered, the asset is impaired to its recoverable amount.

The cost of major investments and other subsequent expenses are included in the carrying amount of the asset. Major investments are capitalized over the remaining life of the asset.

e. Intangible assets

(i) Other intangible assets

Other intangible assets acquired by the Company are stated at cost less accumulated amortization and impairment.

Subsequent expenditure on intangible assets is capitalized only when it increases the future economic benefits generated by the asset to which it relates. Expenditure that does not meet these criteria is recognized as an expense when incurred.

(ii) Amortization of intangible assets

Amortization is recognized in the statement of comprehensive income based on the linear method over the estimated useful life of the intangible asset. Most of the intangible assets registered by the Company are computer programs. They are linearly amortized over a period of no more than 5 years.

f. Real Estate Investments

A real estate investment is held to earn rental income or increase the value of the capital or both. Therefore, a real estate investment generates treasury flows that are largely independent of other assets held by an entity.

The Company's accounting policy for the subsequent valuation of real estate investments is based on the fair value model. Changes in fair value are recognized in the statement of comprehensive income.

g. Assets purchased under lease agreements

Assets held as a result of financial leasing are identified as assets of the Company at their fair value at the beginning of the lease term.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

h. Stocks

Stocks are stated at the lower of cost and net realizable value.

The cost is determined based on the first in - first out method ("FIFO").

The net realizable value is the estimated sale value less the estimated completion costs and the expenses incurred for the sale.

Costs of finished products and semi-finished products include materials, direct labor, other direct costs and overhead costs related to production (based on operating activity). Net realizable value is the estimated sales price in ordinary transactions. Adjustments for stock impairment are recognized for those stocks that are slow, physically or morally worn. The stocks for which it could not be estimated whether in the immediate period they would be consumed or if those stocks represent safety stocks for certain installations are not subject to adjustment.

i. Impairment

The carrying amounts of Company's non-financial assets, other than stocks and receivables on the deferred tax, are reviewed at each reporting date to determine whether there is any evidence of impairment. An impairment loss is recognized if the carrying amount of an asset or a cash-generating unit exceeds the estimated recoverable amount.

The recoverable amount of an asset or a cash-generating unit is the maximum of the amount of use and fair value less costs to sell. In determining the value in use, expected future cash flows are updated to determine the present value, using a pre-tax discount rate that reflects current market assessments of the time value of money and asset specific risks. For impairment testing, assets that cannot be individually tested are grouped into the smallest asset group that generates cash inflows from continuous use and are largely independent of cash inflows generated by other assets or groups of assets ("cash-generating unit").

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

i. Impairment (continued)

Impairment losses are recognized in the individual statement of comprehensive income. Impairment losses recognized in relation to cash-generating units are used first to reduce the carrying amount of goodwill allocated to the units, if any, and then pro-rata to reduce the carrying amount of other assets within the unit (group of units).

For all fixed assets, except for goodwill, impairment losses recognized in prior periods are measured at each reporting date to determine whether there is evidence that loss has decreased or is no longer present. An impairment loss is restated if there has been any change in the estimates used to determine the recoverable amount. An impairment loss is restated only to the extent that the carrying amount of the asset does not exceed the carrying amount that could have been determined, net of amortization, had no impairment been recognized.

(i) Financial assets (including receivables)

Adjustment for impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms. The establishment of risk adjustments for the non-collection of trade receivables is made by including in the expense the amount of the need for risk adjustments for non-collection of trade receivables related to the invoices in the balance for which one of the following conditions is fulfilled:

- a) outstanding commercial receivables older than 90 days from the due date, with an adjustment rate of 100%;
- b) the classification of these exposures into one category, based on the principle of downgrading by contamination, the adjustment coefficient is 100% for all unpaid invoices in the balance. As a result of this downgrade, the entire outstanding balance of customers older than 90 days is impaired.

The Company derecognizes a write-down of receivables previously constituted at the time of recovery wholly or in proportion to the amount recovered.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

i. Impairment (continued)

The determination of the amount of the adjustment for impairment of the trade receivables to be established is based on the estimates made in collaboration with the Law Office and on the basis of the policies mentioned under (i).

(ii) Non-financial assets

Tangible assets and other long-term assets are reviewed to identify impairment losses whenever events or changes in circumstances indicate that the carrying amount can no longer be recovered.

Impairment losses on non-financial assets are recognized in the statement of comprehensive income.

j. Employee benefits

(i) Determined contribution plans

In the normal course of business. The company pays health, pension and state unemployment benefits to its employees at statutory rates.

All the Company employees are members of the pension plan of the Romanian state. These costs are recognized in the Statement of comprehensive income with the recognition of salary expenses.

The company is not engaged in any independent pension scheme and therefore has no other obligations in this respect.

Also, according to the Collective Labor Agreement, when fulfilling the legal conditions for retirement, respectively for uninterrupted seniority in the Company, employees are entitled to receive a reward.

On 31 March 2018, the Company's management did not assess the present value of future liabilities in respect of these benefits in kind and cash rewards based on an actuarial basis and recorded a provision on these liabilities based on an internal analysis.

(ii) Short-term benefits

The short-term benefits of employees include salaries, bonuses and social security contributions. Short-term employee benefits are recognized as an expense when services are rendered. A provision is recognized for the amounts expected to be paid in the form of short-term cash bonuses under the conditions in which the Company currently has a legal or implicit obligation to pay those amounts as a result of past service rendered by employees and if the respective obligation can be estimated reliably.

(iii) Benefits for termination of employment contracts

The company grants the following benefits to employees in the event of termination of the employment contract as a result of retirement, as follows:

- Employees retiring for old age, disability, partially early or early will receive an end-of-career reward as follows:

- those with seniority in the Company of over 15 years, two average basic salaries negotiated on the company;
 - those with seniority in the Company between 5 and 15 years, one basic average salary negotiated on the company;
- Employees retiring as a result of an accident or an event related to work and who have a seniority in the company of between 0 and 5 years will benefit from a basic salary negotiated on the company.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

k. Provisions

Provisions are recognized when the Company has a legal or implicit obligation as a result of past events, when for the settlement of the obligation an outflow of resources is required, and when a credible estimate can be made in terms of the obligation value.

Provisions for restructuring, litigation, and other provisions for risks and expenses are recognized when the Company has a legal or implicit obligation arising from a previous event, when it is probable that an outflow of resources will be required to settle the obligation and when a credible estimate of the amount of the obligation can be made. Restructuring provisions include the direct costs generated by the restructuring, i.e. those that are necessarily generated by the restructuring process and are not related to the continuous development of the company's business.

(i) Guarantees

Provisions for guarantees to customers are estimated by the Company based on the cost of repairs during the warranty period against the value of turnover in the previous financial year,

(ii) Employee benefits

The Company sets up provisions for the benefits of employees granted upon termination of the employment contract with retirement. Determination of the amount of the provision to be set up shall be made taking into account the provisions of the collective labor agreement of the Company valid at the date of provisioning,

(iii) Disputes

The Company sets up provisions for litigation if there is a legal or implicit obligation arising from a litigation in progress. Determining the amount of the provision to be established is based on the estimates made by the law firm,

(iv) Other provisions

The Company makes any other provision when the Company has a legal or implicit obligation arising from a previous event, when it is probable that an outflow of resources will be required to settle the obligation and when a credible estimate can be made as to the amount of the obligation,

Provisions for future operating losses are not recognized.

l. Incomes

(i) Sale of goods

The income consists of the amount invoiced for the sale of products without VAT, deduction or reduction. Income obtained by the Company is identified based on the sale of products.

Income from the sale of goods must be recognized by the Company when all the following conditions were fulfilled:

- the company has transferred to the buyer the risks and the significant benefits associated to the property right on the goods;

- The company does not manage the goods sold at the level at which it would've done it normally in case of holdings in property of these and does not detain the effective control upon this either;
- The value of the incomes may be assessed in a reliable way;
- It is probable that the economic benefits associated to the transaction to be generated for the entity; and
- The supported costs or the ones that are to be supported in relation with that transaction may be assessed in a reliable way.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

I. Incomes (continuation)

(i) Sale of goods (continuation)

The sale of products is recognized when transferring certain important risks and benefits to the client. This happens when the Company has sold or delivered products to the clients, this has accepted the products, and the reimbursement capacity of those amounts is ensured in a reasonable way.

(ii) Provision of services

The provision of services is recognized in the accounting exercise in which the services are provided referring to the percentage of execution of the transaction.

(iii) Income from leases

The income from leases is recognized in the accounting exercise in which these are provided.

m. Governmental subsidies

The subsidies from the government for the procurement of assets are recognized as deferred income and is allocated as a systematic and rasion income the entire life of the asset.

n. Suppliers and assimilated accounts

Debts to suppliers and other debts, registered initially as fair value and then assessed using the method of effective interest rate, include the counter-value of the invoices issued by suppliers of products, performed works and provided services.

o. Financial incomes and expenses

Incomes and expenses on interests are recognized in the statement of the global result through the method of effective interest.

Incomes from dividends are recognized in the Statement of the global result on the date on which the right to receive these incomes was established.

Exchanges rate differences that arise when reimbursing monetary elements or conversion fo monetary elements at different exchange rates than those converted at the initial recognition (during the period) or in the previous financial statements are recognized as loss or profit in the Statement of the global result during the period they occur.

p. Contingents

Contingent debts are not recognized in the enclosed financial statements. These are presented if there exists the possibility of an outcome as resources that represent possible economic benefits, but not probable ones, and/or the value may be estimated in a credible way. A contingent asset is not recognized in the enclosed financial statements, but it is presented when an entry of economic benefits is probable.

q. Corporate tax

The profit tax on 31 March 2018 consists of the current tax and deferred tax.

The current tax represents the tax that is to be paid or received for the taxable income or loss achieved during the year, using taxation percentages adopted or largely adopted on the reporting date, as well as any adjustment to the payment obligations of the profit tax associated to the previous years. The current tax to be paid includes also any fiscal receivable that arises from declaring dividends.

Deferred tax is recognized considering the temporary differences between the accounting value of the assets and debts used with the purpose of the financial reporting and the fiscal base used for the calculation of the tax. Deferred tax is not recognized for the following temporary differences:

- initial recognition of the assets or debts arising in a transaction that is not a combination of undertaking and which do not affect the accounting or fiscal profit or loss;
- Differences between the investments in jointly controlled branches or entities, to the extent in which it is probable that these are not to be reassessed in the future; and
- Taxable temporary differences resulted from the initial recognition of the trade fund.

Receivables and debts with deferred tax are compensated only if there exists the legal right to compensate debts and receivables with the current tax, and if these refer to the taxes asked by the same fiscal authority to the same entity, or a different taxable entity, but which intends to conclude a convention on the receivables and debts with the current tax on a net base or whose assets and debts from taxation are to be achieved simultaneously.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT.)

q. Profit tax (continuation)

A receivable on the deferred tax is recognized for not-used fiscal losses, fiscal credits and deductible temporary differences, to the extent in which the achievement of taxable profits is probable, that will be available in the future and that will be used. Receivables on deferred tax are reviewed at each reporting date and are diminished to the extent in which it is not probable that a fiscal benefit will be achieved. The effect of the changes of fiscal rates on the deferred tax is recognized in the Statement of the global results, except the case in which it refers to the positions previously recognized directly in the own equities.

Profit tax is recognized in the Individual financial statement of the global result or in other elements of the global result if the tax is associated to capital elements.

Current tax is the tax paid associated to the profit achieved in the current period, determined based on percentages applied in the date of the reporting and all the adjustments associated to the previous periods.

The current rate of the profit tax in Romania is of 16%.

The deferred tax is calculated based on the taxation percentages that are to be applied to the temporary differences when resuming them, based on the legislation in force at the reporting date.

r. RESULT PER SHARE

The basic result per share is calculated through the distribution of the net results attributable to the shareholders to the number of ordinary shares at the end of the year.

s. Principle of business continuity

The individual financial statements were drafted based on the principle of business continuity that presumes that the Company is going to continue its activity in a normal way in a foreseeable future, without entering into the impossibility to continue its activity and without its significant reduction. In order to assess the applicability of the presumption, the management analyzes the presumptions regarding the future cash entries. Based on these analyses, the management believes that the Company can continue its activity in the foreseeable future and thus, the application of the principle of business continuity in drafting the financial statements is justified.

t. Affiliated parties

According to the definition of the affiliated parties presented in the IAS 24 standard, the Company has identified the following affiliated parties:

<u>Entity</u>	<u>Nature of the relationship</u>
SIF Moldova	Parent company
Romanian Opportunities Fund. loc. Windward Caiman	Significant shareholder
Transport Ceahlau SRL	Affiliated company

SIGNIFICANT ACCOUNTING POLICIES (CONT.)

u. Reporting on segments

A segment is part of the Company that involves in activity segments that may obtain incomes and register expenses (including incomes and expenses corresponding to transactions with other parties of the same entity), whose operation results are followed regularly by the management of the Company in order to make decisions regarding the resources that are to be allocated to the segment and to evaluate its performances and for which distinctive financial information is available. The company does not detain geographical segments or of significant activity according to IFRS 8 "Operational segments" and does not have a management and internal reporting structure divided on segments.

4. DETERMINATION OF THE FAIR VALUE

Certain accounting policies of the Company and requirements for the presentation of the information require the determination of the fair value both for the financial assets and debts as well a for the non-financial ones. Fair values were determined with the purpose of the assessment and/or presentation of information based on the methods below described. When appropriate, additional information on the hypotheses used in determining the fair value are presented in the notes specific for that certain asset or debt.

The fair value represents the prices that would be received following the sale of an asset or the price that would be paid to transfer a debt by a normal transaction between the participants at the market, at the date of the assessment, regardless if this price is observable or estimated used a direct assessment technique. In the estimation of the fair value of an asset or a debt, the Company takes into consideration the characteristics of the asset or debt that the participants at the market would take into consideration for the determination of the price of the asset or the debt, at the date of the assessment. The fair value with purposes of assessment and/or presentation in the individual financial statements is determined on such a base, except for the assessments that are similar to the fair value, but do not represent the fair value, such as the net achievable value in IAS 2 or the use value in IAS 36.

Additionally, for purposes of financial reporting, the assessments at fair value are classified in Level 1, 2 or 3. depending on the degree in which the information necessary for the determination of the fair value are observable and the importance of this information for the Company, as follows:

- Level 1 Information - listed prices (unadjusted), on active markets, for assets and debts identical with those that the company assesses;
- Level 2 Information - information, other than the prices listed included in Level 1, that are observable for the assessed asset or debt, directly or indirectly; and
- Level 3 Information - information unobservable for the asset or debt.

(i) Tangible assets

The company proceeds to the reassessment of the tangible assets and real estate investments in its own patrimony with sufficient regularity that these are presented in the financial statements at fair value.

5. REVENUES

	31 March 2018	31 March 2017
Sales of goods	10,555,310	11,662,858
Services rendered	73,497	36,624
Income from leasing the real estate investments	118,208	58,703
Total income	10,747,015	11,758,185

The turnover of the Company associated to the first quarter of 2018 is of RON 10,747,015 (First quarter of 2017: RON 17,785,185), out of which RON 581,975 to export (First quarter of 2017: RON 373,027) and RON 10,165,040 to intern (First quarter of 2017: RON 11,385,158).

By structure, the main source of turnover was the sale of own production, with a share of 77 %. The share of products under distribution - Steyr tractors, Projeht herbicide equipment, Stoll front loaders - in the turnover of the company in the first quarter of 2018 was 19%.

6. OTHER INCOME

	31 March 2018	31 March 2017
Income from indemnities and penalties	1,217	3,604
Income from subsidies for investments	-	379
Other operating incomes	2,714	24,621
Income from the production of tangible assets	16,940	43,515
Other income total	20,871	72,119

7. OTHER EXPENSES

	31 March 2018	31 March 2017
Expenses relating to external services	1,141,928	2,011,686
Other taxes, duties and similar expenses	58,200	16,294
Other operating expenses	44,568	79,747
Total other expenses	1,244,696	2,107,727

7. OTHER EXPENSES (continued)

	31 March 2018	31 March 2017
Other operating expenses	44,568	79,747
<i>(i) Compensation, fines and penalties</i>	2,093	46
<i>(ii) Sponsorship</i>	11,828	-
<i>(iii) Employee benefits</i>	0	34,458
Social benefits	7,028	4,458
Stimulation fund	4,800	5,550
Gift vouchers	0	24,450
<i>(iv) Other operating expenses</i>	30,647	45,243

8. EXPENSES RELATING TO SALARIES, SOCIAL SECURITY CONTRIBUTIONS AND OTHER BENEFITS

	31 March 2018	31 March 2017
Salaries and social security contributions		
Salaries	1,641,952	1,223,922
Mandatory social security contributions	41,733	361,509
Expenses with granted vouchers	76,759	85,164
Total	1,760,444	1,670,595
Average number of employees	157	164

According to the collective labor agreement, the employee benefit plan contains:

- Social benefits amounting to 7,028 lei. According to art. 110 of the applicable CLA, the company provides social aid in the event of death, equal to an average salary negotiated in the relevant month at company level, bears the costs of treatments, prostheses and medication in the event of a workplace accident;
- gifts in salary amounting to 4,800 lei, granted in accordance with art. 124 of the applicable CLA. For celebrating March 8, a stimulation fund is set up for women;

The short-term benefits granted to employees are recognized as expenses at the time of rendering the services.

The company has established provisions for the employee benefits granted upon termination of employment by retirement, according to the Collective Labor Agreement applicable on 31,03,2018, the information is presented in Note 22 Provisions for "Employee benefits",

9. FINANCIAL REVENUES AND EXPENSES

Recognized in the Global result statement	31 March 2018	31 March 2017
Interest income relating to loans granted and present value of receivables	-	-
Interest income relating to bank deposits	208	1,132
Net gain from exchange rate differences		5,098
Net gain on financial assets	16,510	12,932
Other financial incomes	-	-
Financial revenues total	16,718	19,162
Interest expenses	14,284	4,006
Net foreign exchange loss	926	
Other financial expenses	54,614	154,771
Financial expenses total	69,824	158,777
Net financial result	(53,106)	(139,615)

Financial revenues are recognized in the Global result statement under an accrual-based accounting system using the effective interest rate method.

The net gains relating to financial assets held at fair value through the profit and loss account is an increase in the value of the owned fund units, pursuant to the valuation on 31 March 2018.

Financial expenses include the interests and discounts granted, as well as the foreign exchange losses.

Gain and losses from exchange rate differences are reported on a net basis. The value of foreign exchange gains on 31 March 2018 is of RON 12,323, while the value of foreign exchange losses is RON 13,249.

Other financial expenses are represented by financial discounts granted to customers.

10. CORPORATE TAX EXPENSE

Corporate tax	31 March 2018	31 March 2017
Current corporate tax	347,744	205,043
Deferred corporate tax Revenue / (Expense)	72,760	36,538
	31 March 2018	31 March 2017
Accounting profit before tax	1,618,479	1,735,824
Expenses relating to a 16% corporate tax	258,957	241,581
Effect of non-taxable revenues	(73,515)	(253,480)
Effect of non-deductible expenses in determining the taxable profit	162,302	13,733
Effect of temporal differences	72,760	36,538
Corporate tax	420,504	241,581

11. RECEIVABLES AND DEBTS RELATING TO THE DEFERRED TAX

On 1 May 2009, the provisions of the Government Emergency Ordinance no. 34 became effective, which served to limit the deductibility of certain expenses when calculating the corporate tax, where the greatest influence was represented by the non-deductible nature of depreciating the re-valuations performed pursuant to 2004, with a significant impact on the corporate tax expenses of the Company. On 31 March 2018, the unused re-valuation reserve, relating to re-evaluations performed after 1 January 2004, is of RON 11,426,223.

Debts relating the deferred income are represented by the corporate tax values, payable in future accounting periods, concerning the taxable temporary differences. The tax rate used to determine the deferred corporate tax is provided in the fiscal regulations applicable at the date of drawing up the financial statements, specifically 16%.

On 31 March 2018, deferred tax receivables were recognized for those provisions in the balance that were non-deductible at the time of calculating the current corporate tax.

Receivables and debts on deferred tax are given to the following elements:

	ASSETS		DEBTS		NET	
	31 March 2018	01 January 2018	31 March 2018	01 January 2018	31 March 2018	01 January 2018
Tangible assets	0	0	(62,192)	(69,358)	62,192	69,358
Trade receivables	0	0	0	0	0	0
Provisions and adjustments	1,083,848	1,149,443	0	0	1,083,848	1,149,443
Reserves from reassessment	0	0	2,622,934	2,627,292	(2,622,934)	(2,627,292)
Fiscal facility reserves	0	0	54,276	54,276	(54,276)	(54,276)
Total	1,083,848	1,149,443	2,615,018	2,612,210	(1,531,170)	(1,462,767)

12. TANGIBLE ASSETS (continued)

(i) Reassessment

On 31 December 2005, all assets in the property of the Company were re-valued in accordance with the regulations in effect at that time, based on a report drawn up by an independent assessor. The assessments were based on fair value, respectively the closest as value of the transactions on that date. The re-valuation surplus was recognized as a reassessment reserve in the equity.

On 31 December 2007, the Company has reassessed the tangible assets - group: "Buildings", based on a report drawn up by an independent assessor, member of ANEVAR. The assessments were based on fair value, respectively the closest as value of the transactions and the inflation index on that date. The reassessment surplus was recognized as a reassessment reserve in the equity.

On 31 December 2010, the Company has reassessed the tangible assets - group: „Buildings“ of the Company by an own commission of specialists and reviewed by as assessor, ANEVAR member. The reassessment focused on the adjustment of the net book values of tangible assets in the "Buildings" group to their fair value, that is the closest in value to the transactions at that date, considering their physical condition and market value. The reassessment surplus was recognized as a reassessment reserve in the equity. The decrease that compensates the previous increase of the same asset is diminished from the previously established reserve; all the other decreases are recognized as cost in the Statement of the global result.

On 31 December 2013, the Company has reassessed the tangible assets - group: "Buildings" of the Company were reassessed by an independent assessor, member of ANEVAR. The reassessment focused on the adjustment of the net book values of tangible assets, special buildings and constructions, to their fair value. The reassessment surplus was recognized as a reassessment reserve in the equity, respectively as an income if, pursuant to a previous reassessment, a reassessment expense was recorded. The decrease that compensates the previous increase of the same asset is diminished from the previously established reserve; all the other decreases are recognized as cost in the Statement of the global result.

The lands are presented in the balance sheet at face value, their last reassessment being registered in 2005. Following this date, the lands were not reassessed because of the fact that there was no active market for lands.

(ii) Pledged or mortgaged tangible assets

On 31 March 2018, the Company holds pledged or mortgaged tangible assets with a total book value of RON 1,049,695, of which lands amounting to RON 515,829 and buildings amounting to RON 533,866.

The net book value of the fixed assets purchased under financial leasing was of RON 273,527 on 31 March 2018.

13. INTANGIBLE ASSETS

13. INTANGIBLE ASSETS (continued)

Intangible assets on 31 March 2018, at a net value of RON 131,546 (1 January 2016: RON 140,392), are represented by the undepreciated value of licenses, technological documentation and computer software used.

Amortization of intangible assets

The amortization period for intangible assets is limited to 10 years.

14. REAL ESTATE INVESTMENTS

	31 March 2018	31 March 2017
Net value	1,608,409	1,608,409
	31 March 2018	31 March 2017
Balance on January 1	1,608,409	1,608,409
Purchases/sales of real estate investments	-	-
Gains/losses from valuation at fair value	-	-
Balance on 31 March 2018	1,608,409	1,608,409

Real estate investment comprises a number of 14 commercial properties and associated land leased to third parties under 12-month agreements with an option for extension.

Real estate investments are real estate properties (lands, buildings or parts of a building) owned by the company with the purpose of lending them, by operational leasing or for the increase of their value. The company has determined the market value of the real estate investments based on an assessment report drafted by an ANEVAR authorized valuator.

Value of the leasing revenues for the first semester of 2018 was RON 118,2080. The company did not perform significant repairs and did not undertake other costs relating to real estate investments in the first quarter of 2018.

Certain properties also include a part that is owned for leasing purposes and another part owned for the production of goods, provision of services or for administrative purposes. In case that the part owned for leasing purposes does not occupy a significant share, the property continues to be treated as a tangible asset,

The company uses the fair value method, as presented in note 3, item f. „Real Estate Investments”

15. INVENTORIES

	31 March 2018	1 January 2018
Raw materials and consumables	2,217,304	1,783,784
Work in progress	774,360	1,244,611
Semi-finished goods	62,134	81,417
Finished goods	11,089,173	10,385,856
Goods purchased for resale	2,475,843	3,565,398
Impairment adjustments	(1,151,250)	(1,152,468)
Stocks at net value	15,467,564	15,908,598

The value of any inventory write-down to its net realizable value and all inventory losses are recognized as an expense for the period in which the write-down or loss has occurred,

The adjustments for the impairment of raw materials, consumables, semi-finished goods, finished goods and goods purchased for resale are recognized for those inventories that are moved slowly, physically or morally outdated. The adjustment does not cover those inventories for which an estimation could not be made as to whether they will be placed in consumption in a brief time or if those inventories are designated as backup inventories,

Adjustments for the impairment of stocks in the amount of RON 1,151,250 arise from:

- adjustments raw materials and materials RON 71,359;
- adjustments matrixes, sdvs: RON 392,102;
- adjustments productions under execution RON 116,711;
- adjustments finished products RON 479,423;
- adjustments goods RON 91,657.

16. TRADE AND SIMILAR RECEIVABLES, OTHER RECEIVABLES AND ACCRUED EXPENSES

	31 March 2018	1 January 2018
Trade receivables	18,370,754	16,552,333
Adjustments for the impairment of trade receivables	(1,993,972)	(2,006,382)
Net trade receivables	16,376,783	14,545,951
Sundry debtors	201,922	201,226
Advance payments to suppliers	95,079	48,672
VAT receivable and under settlement	79,233	47,675
Adjustment for other receivables	(105,052)	(105,052)
Other receivables	101,072	74,543
Total	16,749,038	14,813,015

24. INSTRUMENTE FINANCIARE

General presentation

The company is exposed to the following risks from the use of the financial instruments:

- Credit risk
- Liquidity Risk
- Market risk

These notes represent information on the exposure of the Company to each of the risks above mentioned, objectives of the Company for the assessment and management of the risk and the procedures used for the management of the capital.

General framework on risk management

The policies of the Company for the management of the risk are defined in such way to ensure the identification and analysis of risks that it confronts, establishment of adequate limits and controls, as well as monitoring the risks and the compliance of the established limits.

The policies and management systems for risks are reviewed regularly in order to reflect the modifications arised in the market conditions and in the activities of the Company. The Company, through its training and management standards and procedures, aims to develop an ordered and constructive control environment, within each employee understands his roles and obligations.

The internal auditor of the Company performs standards and ad-hoc missions to review controls and procedures for the management of risks, their results being presented to the Management Board.

a. Credit risk

The treatment of the counter-party risk is based on internal and external success factors of the Company.

The financial assets, that may expose the Company to the collection risk, are mainly trade receivables and cash availabilities. The company has put in practice a series of policies by which it is ensured that the sale of products is made to clients with an adequate collection. The net value of the receivables for adjustments for impairment represents the maximum amount exposed to the collection risk. The situation on seniority of receivables is presented in Note 16 - Receivables.

The credit risk is the risk that the Company supports a financial loss following the non-fulfillment of the contractual obligations by a client or a counter-party on a financial instrument, and this risk results mainly from trade receivables and financial investments of the Company.

The company has a significant concentration of the credit risk. The company applies policies specifically to ensure that the sale of the products and services is made in such way that the granted trade credit is adequate and continuously monitors the seniority of receivables.

Exposure to credit risk

The accounting value of the financial assets represents the maximal exposure to credit risk. The maximal exposure to the risk credit on the date of the reporting was:

MECANICA CEHLAU S.A.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED ON 31 MARCH 2018

	31 March 2017	1 January 2018
Trade receivables	16,376,783	14,545,951
Other receivables	372,255	267,064
Placement securities and bank deposit	4,108,453	4,091,943
Cash and cash equivalents	2,630,072	4,819,739
	23,487,563	23,724,698

24. FINANCIAL INSTRUMENTS (continuation)

The maximal exposure to the risk credit associated to credits and receivables on the date of the reporting depending on the geographical region was:

	2017	2016
Internal market	10,165,040	11,385,159
Other regions	581,975	373,026
- EU Zone	554,194	373,026
- NON-EU Zone	27,782	-
Total	10,747,015	11,758,185

On the internal market, the Company has collaborated with a number of 22 distributors from the entire country, the most important ones being located preponderantly in the agricultural area.

The volume of sales achieved through the distributors was of 78%, and the direct sales to internal beneficiaries were of 22%.

On the external market, the volume of sales was achieved in proportion of 5% from the turnover. On this market, it is maintained the connection with the traditional clients that know and promote the products of the company.

The company has established a credit policy according to which every new client is analyzed individually from the point of view of reliability and in certain cases references are requested supplied by banks before being contracts of firm sales are concluded. For the purpose of monitoring the risk credit associated to the clients, these are grouped depending on the characteristics of the credit risk, taking into account their classification as legal or natural persons, internal or external clients, seniority, due dates and the existence of certain previous financial difficulties. The clients classified as having a high risk are monitored, following the future sales to be made based in advance payments or using certain banking instruments to guarantee collections.

The policy of the company is to offer service for the products supplied in a guarantee period of 24 months.

On 31 March 2018, the net accounting values of the cash and cash equivalents, suppliers and clients, commitments and short-term debts approximated their fair values due to short term due dates.

b. Liquidity Risk

The liquidity risk is the risk that the Company to overcome difficulties in fulfilling the obligations associated to the financial debts that are reimbursed in cash. The approach of the Company on liquidity risk is to ensure, to the extent possible, that it holds at any time sufficient liquidities to overcome debts when these become due, both in normal and difficult conditions, without supporting significant losses or putting in danger the reputation of the Company.

Generally, the Company ensures that it holds sufficient cash to cover the foreseen operational expenses, including for the payments of its financial obligations. The Company monitors continuously the liquidity risk by drafting periodical presumptions of liquidity flows. In order to cover liquidity risk, that may appear in case that cash availabilities cannot cover the need to finance, the Company has credit line contracts in RON that are not used at this date.
