PRESS RELEASE
regarding the availability of the Report for the third quarter of 2026

Rompetrol Well Services S.A. (Bucharest Stock Exchange symbol: PTR) is one of Romania's leading providers of specialized well services, offering a diversified range of services to the oil and natural gas industry in Romania and Eastern Europe, including cementing, stimulation, specialized pumping, pressure testing, wireline and well instrumentation services, as well as casing running operations.

During the first nine months of 2026, the Company operated in a market environment characterized by volatility and adjustments to the operational programs of its key customers. In this context, the Company continued to execute its existing contracts while pursuing new business opportunities, resulting in a positive evolution of its main financial and operational performance indicators compared to the corresponding period of the previous year.

The Company continuously monitors developments in raw material prices and logistics costs, including the impact of oil price fluctuations on fuel expenses. Should current market conditions persist, these factors may affect the cost of certain products and services for which transportation expenses represent a significant component of the overall cost structure.

Furthermore, the Company continues to assess opportunities to participate in upstream oil and gas projects in the Middle East, as well as geothermal energy projects in both Europe and Romania, with the objective of diversifying its service portfolio and expanding its presence in new markets.

During the reporting period, the Company maintained a sound financial position, ensuring the availability of the resources required to meet its commercial, payroll and tax obligations in full and on time.
