Fiscal Code	RO 26414626
Subscribed and paid share capital	1,628,346.20 lei
Total number of shares	8,141,731
Symbol	SMTL
Market where securities are traded	Bucharest Stock Exchange, Main Segment, Standard Category

Important events to be reported: Completion of the implementation of one of the largest battery energy storage projects in Romania

The management of Simtel Team S.A. (hereinafter referred to as the “Company” or the “Group”) informs the market about the completion of the battery energy storage project carried out for Energy Capital Group, owned by MOGAN Bucharest SRL, part of the GÜRİŞ Group from Turkey. The project, implemented in the village of Iaz, Obreja commune, Caraș-Severin County, represents the largest standalone utility-scale battery energy storage system (BESS) project in the Banat region and one of the most significant energy storage projects completed in Romania to date.

The project, signed in July 2025 and announced by the Company through [Current Report no. 31/2025](#), included the supply of the battery energy storage system, as well as the design, construction, installation, commissioning, completion, and testing of the facility. The system has a storage capacity of approximately 200 MWh and an installed power capacity of 100 MW and includes 44 lithium-ion battery containers, 528 high-power inverters, a 110 kV substation, 11 transformer stations, and an Energy Management System (EMS).

The completion of this project confirms the Company’s ability to deliver complex energy projects within a short timeframe and in compliance with high quality and safety standards. The implementation of an energy storage infrastructure of nearly 200 MWh in only approximately eight

months, on a site presenting significant ground stability challenges, highlights the Company team's technical expertise and operational capabilities. At the same time, energy storage projects are expected to play an increasingly important role in the coming years by supporting the flexibility and stability of the energy system and facilitating the integration of a growing renewable energy capacity into the grid. For the Company, this direction represents one of its strategic development lines, while the experience gained through the implementation of this project provides a solid foundation for the development of similar projects in Romania and across the region.

The Company launched its business line dedicated to energy storage systems in 2024, in response to the growing need for the efficient management of energy consumption and production. These solutions enable active participation in the balancing services market by ensuring the optimal calibration of voltage and frequency, while also contributing to increased grid stability and the efficient integration of renewable energy sources into the national energy system.

Iulian NEDEA
